ACKNOWLEDGEMENTS

This study was carried out at the Department of Biotechnology, Punjabi University, Patiala and Department of Biophysics, All India Institute of Medical Sciences, New Delhi under supervision of Dr. Balwinder Singh Sooch (Punjabi University) and Dr. Savita Yadav (AIIMS). This work was supported by the grants from Department of Science & Technology (DST), Government of India, New Delhi and Indian Council for Medical Research (ICMR), New Delhi. Although this thesis is written under one single name, the work would not have been realized without the contribution of many. I wish to express my earnest gratitude to everyone who has helped and contributed to this work in one way or another.

First of all, I would like to thank ‘Almighty God’ for all the blessings he has filled my life with. All these joyous and cherished moments has made my life more beautiful and meaningful.

It is a profound privilege for me to earnestly acknowledge my outstanding supervisor Dr. Balwinder Singh Sooch, Assistant Professor (Department of Biotechnology, Punjabi University, Patiala) for providing me with an opportunity to join as a Ph.D. student. He is an incredible academician with great scientific vision and intellect. I thank him very much for his useful skills of solving every problem regardless of being small or big. Galvanizing scientific discussions with him always raised enthusiasm in me. His contribution to this thesis has been of incredible valuable due to his continuous support and enthusiasm. He is absolutely the best supervisor one can ever dream of and words are not just enough to express my gratitude for his appreciation.

Next, I would like to thank my co-supervisor Dr. Savita Yadav, Additional Professor (Department of Biophysics, All India Institute of Medical sciences, New Delhi) for introducing me to the world of scientific research and providing me space and opportunity to work in her laboratory. She is a towering personality with immense scientific brilliance having more than 25 years of research experience. She has been a
continuous source of inspiration for me and other researchers in the group. Her laboratory has enabled me to learn exciting protein chemistry and proteomics methods. Also I am indebted to her for taking care of every detailed necessary thing with assurance. Her endless scientific vision and creativity continually produced fruitful ideas, which always led my research work in the proper direction. It is a great privilege that I have been doing scientific research under her supervision.

I gratefully thank **Prof. R.S. Singh**, Head of the Department for helping me with laboratory facilities and great cooperation whenever needed. I also thank **Prof. Praveen P. Balgir**, who earlier headed the department.

I am also thankful to all the faculty members in the Department of Biotechnology, Punjabi University, Patiala; **Prof. Aruna Bhatia, Prof. Neelam Verma, Dr. Seema Gurcha, Dr. Mini, Dr. Baljinder Kaur**, and **Dr. Ranjeeta Bhari** for their valuable advice and constant support. I also sincerely thank faculty members in the Department of Biophysics, All India Institute of Medical Sciences, New Delhi; **Dr. Punit Kaur (Head), Dr. A. Srinivasan, Dr. Sujata Sharma, Dr. Krishna Dalal, Dr. Sharmistha Dey and Dr. Hariprasad G.** for their kind support.

I would express my deepest gratitude to my dear friend, **Dr. Mayank Saraswat**. We have been friends for more than a decade and have shared almost all faces of our lives. He is the first man I rush to in times of crisis, personal or scientific. His critical scientific suggestions have always helped me to improve my work and to develop innovative ideas. We have fought over stupid discussions so many times and simultaneously laughed louder. We have been strengths to each other in hardships of life. He is a brother-in-friend.

The work is nothing without fun and motivating colleagues, so I thank my labmates **Mashkoor, Nirmal, Sushila, Sanjay, Binita, Vinay, Vikas, Vikrant, Neha, Dr. Amol, Taj, Paras, Baljinder** and **Yogita** for all their help and support. I also thank them for all the actions in coffee breaks and lab parties. I specially thank **Sushila, Nirmal** and
Sanjay for their help they provided during experiments, whenever needed, Vinay and Vikas for looking after my experiments during late hours and Vikrant for his company for lunch and nice talks. I would also like to thank Dr. Abhay A Shukla, Dr. Mayank Saraswat and Dr. Abhay K Singh for all the good times and parties during IPL matches. I sincerely thank my friends in the Department of Anatomy, AIIMS; Mukesh and Pawan for helping me in my experiments and allowing me to utilize their laboratory resources. I sincerely thank my friends in Punjabi University; Sanjay, Mandeep, Dr. Puneet and Deepak for all their support and their valuable time they spent with me.

I also acknowledge the support of senior researchers in the Department of Biophysics AIIMS; Dr. Baskar, Dr. Mau, Dr. Jitendra, Dr. Amit, Dr. Jithesh, Dr. Pradeep, Dr. Gajraj, Dr. Sanjit and Dr. Kamal. I will extend this gratitude to other research students as well; Roshan, Sarla, Priyanka, Sanket, Udipan, Dr. Ravi, Sadanand, Avinash, Lovely, Prakash, Rahul, Anshul, and many others.

I also thank all non-teaching and laboratory staff of both departments for their help and co-operation for the successful completion of the work.

I thank all my dear pals, especially Amitava, Shilpi, Surendra, Gopan, Prashant, Abhijit, Ashutosh, Arunava, Rahul and Vishal for their support and all the great laughs & memories we have shared since our first day in college. Thanks for being true friends, always ready to help me with anything in the blink of an eye. They are great buddies to share all of my futuristic ideas and acts of life. Although we do not live in the same cities anymore, I hope with all my heart that we will always stay updated and keep in touch. I also thank my friend, Aman for his company and all the dinners during late night experiments and AIIMS annual festival.

I also thank all my juniors, batch mates, and seniors at Saraswati Vidya Mandir (Mathura), Hansraj College (University of Delhi), IIDS (University of Allahabad) and MIMT (Greater Noida) for the time we spent together and all the memories created in
the journey of educational life. I sincerely thank all the teachers in these institutions for all their teachings and most importantly for the lessons of life they taught to me.

This acknowledgement will sound empty if it does not include my family, without which I stand nowhere. I thank my parents Bijendra Singh Tomar and Shakuntala Tomar for always believing in me and supporting me with all their love. Their love means so much to me. I also thank my Bhaiya & Bhabhi Sanjeev & Deepa, my sisters Sadhana & Anuradha and my cousin Aravind for their love and happy moments during all the family gatherings and festivals. I also thank all the kids in my family Abhishek, Akhil, Lovey, Chunnu, Luv, and Aman for all their naughty deeds and loving smiles that taught me to be happy and smile in every situation.

Here I will extend my gratitude to the most beautiful and imperative person of my life, Pallabi, my loving and beautiful wife for her endless support and understanding. She also presented me the most precious gift of my life, our darling daughter Tanvi. She has been very supportive during the hard days of life and words fall short to thank all her efforts. I also thank my little angel, Tanvi, for all the loving and emotional moments, which otherwise would not have been possible. I also thank my extended family, my parents-in-law for their support.

It is not possible to list all those who contributed directly or indirectly for successful completion of this thesis. This is a mere note of some of them; however, lot many other people have also inspired this journey of Ph.D. I thank them all, who are missed in this acknowledgement, for their kind support and encouragement.

ANIL KUMAR TOMAR
Patiala, January 2013
