ACKNOWLEDGEMENTS
I wish to express my gratitude to Dr. B.A. Wafai, Reader, Department of Botany, University of Kashmir, for inspiring supervision, constructive criticism, valuable suggestions and constant guidance throughout the course of this study. He is mainly responsible for the evolution of my interest in the field of reproductive biology.

Sincere thanks are due to Prof. (Dr.) G. N. Javied, Head, Department of Botany, University of Kashmir, for his encouragement and providing working facilities. Thanks are also due to Prof. V. Koul and Prof. S. Farooq, Ex-Heads of the Department of Botany, for their kind cooperation and timely help.

To Mr. Mir Inayatullah - the then Chief Wildlife
Warden, Govt. of J & K, I am immensely grateful for allowing me to conduct studies in various areas of the Dachigam National Park.

I owe a special debt of gratitude to my friend Dr. M. Ashraf for assisting me in the photography. Friends, namely Dr. Zafar Ahmad Reshi, Dr. Mehraj-ud Din, Dr. Irshad Ahmad and Mr. Mussaied Iqbal gave an excellent company.

My sincere thanks go to Dr. M.I. Tanki, Head, Division of Olericulture and Floriculture/Medicinal and Aromatic Plants and Mr. T.M. Paul, Assistant Professor of the same Division of the University of Agricultural Sciences and Technology, J & K, who showed an unfailing courtesy.

Words fail to express appropriately my heartfelt gratitude and deep sense of eternal indebtedness to my parents for providing me mental solace throughout the course of this project. Their affectionate provocation and constant encouragement helped me a great deal in the accomplishment of this work. The inspirations provided by my father served a source of satisfaction and encouragement especially during the hardships which I had to encounter in my expeditions to higher altitudes of the valley. I also wish to place on record my strong and most affectionate
thanks to my younger brothers and sisters, who helped me in the proof reading of the manuscript.

Help rendered to me in collecting data on some phenological aspects by the Wildlife and Forest Department personnel is also thankfully acknowledged. Thanks are also due to the Incharge Military Camp at Tangmarg for allowing me to work in the restricted area under his custody.

Dr. Michael Zimmerman of the Oberlin College, Ohio, USA, Dr. Jane Villa Locbos of the Smithsonian Institution, Washington DC. and Dr. Lester J. Newman of the Portland State University, Oregon, U.S.A. provided some valuable literature and suggestions.

Director, Zoological Survey of India, Calcutta was kind enough to provide insect identifications.

The generous help extended by late Dr. A. M. Mir, Reader, Department of Botany, University of Kashmir, in giving me a free access to his laboratory equipment can never be forgotten. Dr. G. M. Butt, Reader in the same department extended a timely help by lending his personal field camera.

I am also thankful to Dr. K. J. Ahmad, Head,
Scanning Electron Microscopy Division and to Mr. S. Lal of the same division of the National Botanical Research Institute, Lucknow for their help in the scanning electron microscopy.

Last but not the least, I am heartily thankful to Mr. Mohammad Sidiq Dar, for the patience he observed during typing of the manuscript.

Mohammad Abubakar Ahmad Siddique
