ACKNOWLEDGEMENTS
I am grateful to Dr. R. N. Gohil, Department of Botany, University of Kashmir for guidance and help throughout the period of present investigation. My thanks are due to Dr. T. N. Khoshoo, now Secretary, Department of Environment, Government of India for suggesting this problem when I initially joined him as a research scholar in the University of Jammu and Kashmir.
I take this opportunity to thank Prof. P. Kashroo, Head of the Department of Botany, University of Kashmir for encouragement and for providing the facilities to work. To Prof. A. K. Koul, Department of Biosciences, University of Jammu, I am thankful for encouragement and for giving many suggestions regarding this research problem.

I wish to record my thanks to the authorities of Forest Research Institute, Dehradun for help in the identification of some plants and to the Librarians of Indian Agricultural Research Institute, New Delhi and Panjab University, Chandigarh for allowing me to consult literature. Many of my old and young friends have helped me in various ways in completing this work. I would like to acknowledge the help rendered by Drs. S. P. Vij and T. S. Sareen, both Readers, Department of Botany, Panjab University, Chandigarh, Drs. Ranjana Kaul, A. R. Naqsh and Abid Hussain Munshi and Mrs. Santosh Mujoo, Ravinder Raina, Mohd. Ashraf and Asha of this department for help rendered in various ways.

I thank the Principal, Convent College, Srinagar and Dr. U. Dhar of Central Council for Research in Unani Medicine, Srinagar for allowing me to use plant materials from their vegetable and herbal gardens respectively.

I am also thankful to the Department of
Higher Education, Jammu and Kashmir Government for sanctioning two years study leave in my favour to complete this work.

Last but not the least of all, I wish to record my thanks to my wife and children without whose cooperation, encouragement and tolerance this work would not have been possible.
