ACKNOWLEDGEMENTS

At this moment of accomplishment, first of all I would like to express my profoundest gratitude to my guide, Professor T. Sharma. I have overcome all the difficulties throughout my Ph.D programme by his simple method of teaching and in-depth discussion. His words have always enlightened me to a higher level of thinking. This work would not have been materialized without his guidance, support and encouragement.

I am also extremely indebted to Dr. B.K. Sharma who has always extended his unreserved help and guidance. His continuous enthusiasm, support and advice have led me towards the completion of the thesis. His unflinching courage and conviction has always inspired me. I could not have imagined having a better advisor and mentor for my Ph.D study.

I also thankfully acknowledge the support and advice of the faculty members of Fuel and Mineral Engineering, Applied Mathematics and Environmental Science & Engineering Departments of ISM, Dhanbad to complete the course work during my Ph.D programme.

I also thankfully acknowledge Dr. Amalendu Sinha, Director, CSIR-Central Institute of Mining & Fuel Research (CIMFR), Dhanbad for providing necessary infrastructure and resources to accomplish my research work. His continuous motivation and support is also indispensable to sustain me to complete this thesis.

I am also grateful to all of my colleagues in CSIR-CIMFR, Dhanbad, especially to the members of Gasification Division for their cooperation and support. Thesis writing is like running a long and lonely marathon. I have never travelled in a vacuum in this journey due to the support extended by them.

I pay tribute to my late father whose blessings has given me light in the moments of darkness and provided inspiration to move on towards my goal. I do not find words to express my gratitude to my mother for her constant inspiration and blessings which have strengthened me to carry on even when the going was tough. Last but not the least I would like to thank my wife and my little son for their sacrifice without which I could not have reached my destination.

Sujan Saha
