Acknowledgements

For every beginning there is an ending, however, quest for knowledge is a life-long pursuit and what seems to be an ending is merely a pause that marks another beginning. It is a humble beginning from Nigeria in quest for scientific knowledge and Ph.D training. This juncture is one of such pause. Better is the end of a thing than the beginning thereof...(Ecc 7:8). It is indeed a happy ending and I am indebted to many people who have helped me along the way.

First and foremost my sincere appreciation goes to my supervisors, Dr. Sudip Maity, Sr. Scientist & HOS, Liquid Fuel Section, CIMFR (DC) and Dr. Biswajit Chowdhury, Associate Professor, Dept. of Applied Chemistry, ISM, Dhanbad; for the tutelage, training and mentorship I received under them. I am very grateful for their invaluable inspiration, guidance and supports.

I am thankful to the Director, Central Institute of Mining and Fuel Research (CIMFR), Dhanbad, for accepting me and granting the privilege of my training at CIMFR. My sincere appreciation also goes to the Scientist-in-Charge, CIMFR, Digwadih Campus, for research supports. I am thankful to Director, Indian School of Mines, Dhanbad for granting Ph.D admission. I acknowledge the assistance of Dean (R & D), ISM, Prof. R. Venugopal during my Ph.D admission. I am thankful to HOD Department of Applied Chemistry, ISM, and HOD, Chemicals and Liquid Fuels, CIMFR, Digwadih Campus; and for their advice and supports.

I am indebted to Third World Academy of Science (TWAS, Trieste Italy) and Council for Scientific and Industrial Research (CSIR, India) for granting me the TWAS-CSIR (2008) Postgraduate Research Fellowship to work on Fischer-Tropsch studies at CIMFR (DC), Dhanbad, India. I will be grateful for the invaluable contributions the fellowship has made in my academic career.

I own a lot of gratitude to the staff of Liquid Fuels Division, CIMFR, DC, for their assistance and co-operation during laboratory work and continuous experimental runs for this study. S. K. Maitra, S. K. Das, Soma Mondal, Indal Yadav, Ashok Gorai, Subir Mondal, Satanand Sahu, Rashmi Chaubey, Amit Kr Singh, Shailesh Kumar, Sanjeev Kr Sharma, Ajeet kr Sinha, Milan Kr Paul, Zahir Abbas Ansari, Kumar Anupam, Akshat Yadav, Tanmoy Chakroborty are thankfully acknowledged for their help and supports. I also appreciate my colleagues at Department of Applied Chemistry, ISM, for insightful
discussions, good company and friendship. I also appreciate the prayers and supports from church members at CIMFR, DC. I thank the entire CIMFR (DC) community for their hospitality and affections.

My appreciation also goes to my mentors, Prof. M. Adediran Mesubi and Prof. Kehinde O. Okonjo, for their encouragements. I also acknowledge encouragements from teachers and senior colleagues at Covenant University, Ota, Nigeria, and University of Ilorin, Ilorin Nigeria. I thank my friends, Dr. Kolawole O. Ajanaku, Kehinde O. Ogunniran, Olayinka O. Ajani, Tolulope Siyanbola, Joseph Adekoya, Jide Onifade, Engr. Emmanuel Adetiba, Temitope A. Adeoye, Ayokunle Awelewa, Dayo Afariogun and Femi Afolayan, for their comradeship. I acknowledge assistance of Dr. Aizebeokhai A. Philips and Dr. Abiodun Adebayo while I was applying for the TWAS-CSIR postgraduate fellowship. I cannot but remember a special friend for igniting to fire of zeal to undertake this pursuit. Special appreciation also goes to my family members for their understanding and emotional supports during may stay in India.

This thesis is a reality because of the sustained helps I received from many quarters from the beginning through to the completion the study. I am profoundly grateful to the Lord, God Almighty for His help and for bringing helps my way all through this study. ‘My soul doth magnify the Lord for He hath given help to me his servant’, (Luke 1:54).
