List of tables
List of Tables

Table 2.1 Classification of self nanoemulsifying drug delivery system
Table 2.2 Marketed formulations of SNEDDS
Table 2.3 Marketed formulations of nanosuspensions
Table 4.1 List of materials used during the study
Table 4.2 List of equipments used during the study
Table 4.3 Regression parameters
Table 4.4 Regression parameters
Table 5.1 Layout and observed responses of Box Behnken Experimental Design Batches (average ± standard deviation, n=6.)
Table 5.2 Statistical analysis of BBD Box Behnken Experimental Design Batches
Table 5.3 Solubility of GMP in various surfactants. (average ± standard deviation, n=6).
Table 5.4 Predicted and observed response for optimized GMP loaded SNEDDS
Table 5.5 Area under effect curve value for different groups
Table 6.1 Layout and observed responses of 32 factorial design for formulation variables (polymer to drug ratio and surfactant to drug ratio) (average ± standard deviation, n=6.)
Table 6.2 Statistical analysis of 32 factorial design for formulation variables polymer to drug ratio and surfactant to drug ratio.
Table 6.3 Layout and observed responses of 32 factorial design for process variables (milling speed and milling time) (average ± standard deviation, n=6.)
Table 6.4 Statistical analysis of 32 factorial design for process variables (milling speed and milling time)
Table 6.5 Observed and predicted response of the optimized batch.
Table 6.6 Area under effect curve value for different groups
Table 7.1 Layout and observed responses of Placket Burman design batches (average ± standard deviation, n=6.)
Table 7.2 Results of regression analysis
Table 7.3 Area under effect curve value for different groups
