INDEX

A
abrasion and attrition 93
absolute relief 29
active channels 153
active stream channel 149
aggradations 66
alluvial plain 17
aluminous 24
analysis 42
annual mean 127
annual mean bed height 51
Annual Peak flood series 59
annual retreat 143
Archaean formations 12
assorted boulders 74

B
bank base 137, 140
bank failure 5, 8
bank full discharge 131
bank height 8
bank materials 141
Bar scalping 150
bed erosion 42, 125
bed load traps 151
bed lowering 52
bed material 1, 4, 5, 8, 34, 38, 42, 74, 96, 139, 149, 157
bed material extraction 137, 163
bedding 3
bed-load 68
t
bedrock 93
bench- like deposition 154
boulder lifting 96, 103, 109
boulders 8
boundary pillars 152
braided channel 150
braided channel 31
braided river 154
braiding pattern 8

C
channel 8, 31
channel bed 137
channel competence 39
channel competency 74, 83
channel flow 122, 139
channel geometry 107
channel gradient 127
channel stability 157
channel velocity 34, 127
channel width 33, 137
coarse and fine sand 101
coarse materials 132
coarse sand 138
coarse sediment 74, 75, 68, 156
cobbles 74
cohesiveness 139
colluvial 66, 137
concavity 22
confluence 33
cost-benefit analysis 156
cross profiles 33
cross section 10, 122, 163

D
Daling rocks 23
Daling series 12, 19
Damuda – Daling series 17
Damuda series 13
Darjeeling gneiss 12, 19, 67
debris 67
deciduous 24
deposit 151
design approach 149
discharge 82
downstream 151, 154, 158
Dry-pit channel 150

E
efficiency of the channel 127
embankments 139, 163
energy dissipation 137
entire 143
ephemeral stream 94
epirogenic 6, 32
excessive removal 157
exponential curves 5,
exposed banks 137, 144
extraction pits 125

F
fall velocity 77
fault scarps 19
ferruginous rocks 19
finer sediments 132
flood deposit 138
flood frequency 4, 59
flood magnitudes 131
flood plains 3, 94, 109, 150
flow regime 107
flow spell 56
fluvial dynamics 6,
fluvial geomorphology 158
fluvio-geomorphic 9, 158
foot hill 17, 27
form and processes 42
frequency 42
frequency factor 60

G
glacio-fluvial process 3
Gondwana 14
gradient 8, 31
grain size 80
gravels 74, 98, 151
Grid sampling method 11
ground-water 149

H
hydraulic 4
hydraulic characteristics 158
hydraulic control 151
hydraulic mean depth 129
hydraulic parameters 9, 42
hydraulic radius 127
hydraulic structure 152
hydraulics 68, 158
hydrograph 44
hydrologic 149
hydrological condition 8
hydrology 10

I
inactive channel 109
incision 1, 108, 130
infiltration 46
instable banks 139
in-stream bed materials 98
intermediate axis 68

K
knick point migration 129

L
land use 1, 29
lateral instability 8, 31
lateral migration 153
levees 108
livelihood 103
loose unassorted 137
lower course 6
lower reaches 57
low lands 22

M
masses 66
mean annual elevation 125
mean bed elevation 122, 123
mean depth 38
mean hydraulic radius 127
monsoon regime 162
monsoon trough 25
morphological characteristic 110
morphology 8, 31, 66
morphotectonic 33
mud-flats 33

N
narrow width 157
near-bank extraction 132
northern uplands 22

P
Partial duration series 59
peak discharge 44
peak flow 44
pebbles 98
perennial channel 94, 150
Permo – Carboniferous 18
Piedmont 14
planimetric resurvey 141
probability 42
processes 149
reclamation 149
Redline 155
regime 66
replenishment 123
restoration 149
riparian vegetation 108, 158
river energy 83
river run-off 46, 86
river-bed 153
rivulets 2
rock fragments 155
rotational slips 140
roughness coefficient 132

S
sand bars 33
sand extraction 154
scouring 124, 132, 143
scrapers 150
sediment capacity 107
sediment load 139, 162, 162
sediment replenishment 153
sediment size 66, 98
sediment transport 107
shear strength 137
shear stress 139
shearing resistance 33
shifting 4
silicious 24
siltation 8, 144
Siwalik – Damuda Sandstone 18
Skimming 150
slope instability 29
southern undulating 22
state of equilibrium 32
stream flow 149
stream power 128
stretch 143
sub-angular boulders 137
sub-cycles 33
Sub-recent Pleistocene 14
subsidence soil 24
surface erosivity 1
surface irregularities 150
surface run-off 7, 47, 80
suspended load 80, 81, 82
Suspended sediment yield 87, 89
sustainable development 155

T
temperate evergreen 25
Terai 14
terraces 94, 109, 139
thalweg elevation 157
top soil 24, 138
transit through 93
transition zone 17
tropical genera 25
truncated top 23

U
un-assorted boulders 74
under cutting 140, 141
unstable 32
unstable bars 34
upstream 108, 154, 158
varied flow 77
virgin forests 24

W
water level 54, 130
water table 149
watershed processes 157
well-sorted 93
Wet-pit extraction 150
wetted perimeter 40
widening 39
