I. Nonequilibrium Superconductivity

1. Introduction

2. Superconducting ground state and excitations

2.1 Nonequilibrium State

2.2 Longitudinal mode or Energy mode

2.3 Transverse mode or Charge imbalance mode

3. Relaxation Processes

3.1 Relaxation of Charge Imbalance

a) Phonon Scattering

b) Anisotropic Energy Gap

c) Magnetic Impurities

d) Supercurrent

3.2 Order Parameter Relaxation

a) Slow Variation of order parameter

b) Rapid variation of order parameter

4. Enhancement of Superconductivity

4.1 Enhancement by Microwave irradiation

a) Effect of Phonons

b) Effect of Supercurrent

4.2 Enhancement by Phonons

4.3 Enhancement by quasiparticle tunnelling

5. Suppression of Superconductivity

5.1 The $\mu^*$ and $T^*$ models

5.2 Optical Illumination
## II. Kinetic Equations for a Superconductor
