### CHAPTER I  INTRODUCTION

1.1 Nature of Science and Science Teaching 2
1.1.1 Nature of Science Concept 2
1.1.2 What is Science? 4
1.1.3 Teaching Science in School 5
1.1.4 Teaching Science in Yemen 7
1.1.5 Objectives of Teaching Science in School 7
1.2 Rationale and Significance of the Study 9
1.3 Statement of the Problem 13
1.4 Delimitation of the Study 14

### CHAPTER II  THEORETICAL BACKGROUND OF THE STUDY

2.1 Marzano’s Dimensions of Learning Model 16
2.1.1 Design of Dimensions of Learning Model 16
2.1.2 What are the Five Dimensions of Learning?
   2.1.2.1 Dimension 1: Positive Attitude and Perceptions about Learning
   2.1.2.2 Dimension 2: Acquiring and Integrating Knowledge
   2.1.2.3 Dimension 3: Extending and Refining Knowledge
   2.1.2.4 Dimension 4: Using Knowledge Meaningfully
   2.1.2.5 Dimension 5: Productive Habits of Mind

2.1.3 The Relationship among the Dimensions of Learning

2.1.4 The Dimensions Planning Models
   2.1.4.1 Model 1: Focus on Knowledge
   2.1.4.2 Model 2: Focus on Issues
   2.1.4.3 Model 3: Focus on Student Exploration

2.1.5 Assessing the Dimensions of Learning

2.2 Creative Thinking
   2.2.1 Creative Thinking Concept
   2.2.2 How to Develop Creative Thinking?
   2.2.3 Stages of Creative Thinking Process
   2.2.4 Skills of Creative Thinking
   2.2.5 The Role of the Teacher for Developing Creative Thinking
   2.2.6 Measurement of Creative Thinking Ability
   2.2.8 Obstacles to Creativity and How Can they be Overcome

2.3 Attitude towards Science
   2.3.1 Attitude towards Science Concept
   2.3.2 Component of Attitude towards Science
   2.3.3 Methods of Attitude Measurement

CHAPTER III REVIEW OF RELATED LITERATURE
   3.0 Introduction
   3.1 Studies Related to Dimensions of Learning Model
4.2.6.1 Intelligence Test – IT (Saleh, 1978) 99
4.2.6.2 Achievement Test in Science (ATS) 99
4.2.6.3 Torrance Creative Thinking Test (TTCT) - Verbal (B) Form 110
4.2.6.4 Attitude Scale towards Science (ASTS) 112
4.2.6.5 Student’s Reaction Scale (SRS) 116

4.2.7 Implementation of Intervention Program 117
4.2.7.1 Administration of Pre-tests 118
4.2.7.2 Intervention Program 118
4.2.7.2.1 Teaching-Learning-Activities and Evaluation for Experimental Group 118
4.2.7.2.2 Teaching Control Group 122
4.2.7.3 Administration of Post-tests 122
4.2.7.4 Data Analysis and Statistical Techniques Used 122

CHAPTER V ANALYSIS AND INTERPRITAION OF THE DATA
5.0 Introduction 125
5.1 Quantitative Analysis of the Collected Data 125
5.1.1 Testing the Significant Differences between Pre-test Means of the Experimental and Control Groups on Achievement in Science, Creative Thinking and Attitude towards Science 126
5.1.1.1 Testing the Significant Differences between Pre-test Means of the Experimental Group and the Control Group on Achievement in Science 126
5.1.1.2 Testing the Significant Differences between Pre-test Means of the Experimental Group and the Control Group on Creative Thinking. 127
5.1.1.3 Testing the Significant Differences between Pre-test Means of the Experimental Group and the Control Group on
Attitude towards Science.

5.1.2 Testing the Significant Difference between Pre-test Means of the Experimental Group Students with Respect to Gender Groups in achievement in Science, Creative Thinking and Attitude towards Science

5.1.2.1 Testing the Significant Difference between Pre-test Means of the Experimental Group Students with Respect to Gender Groups in Achievement in Science

5.1.2.2 Testing the Significant Difference between Pre-test Means of the Experimental Group Students with Respect to Gender Groups in Creative Thinking

5.1.2.3 Testing the Significant Difference between Pre-test Means of the Experimental Group Students with Respect to Gender Groups in Attitude towards Science

5.1.3 Testing the Effect of Dimensions of Learning Model on Post-test Means of the Experimental Group and the Control Group in Achievement in Science, Creative Thinking and Attitude towards Science

5.1.3.1 Testing the Effect of Dimensions of Learning Model on Post-test Means of the Experimental Group and the Control Group in Achievement in Science

5.1.3.2 Testing the Effect of Dimensions of Learning Model on Post-test Means of the Experimental Group and the Control Group in Creative Thinking

5.1.3.3 Testing the Effect of Dimensions of Learning Model on Post-test Means of the Experimental Group and the Control Group in Attitude towards Science

5.1.4 Testing the Significant Difference between Post-test Means of the Experimental Group Students with Respect to Gender Groups in Achievement in Science, Creative Thinking and Attitude towards Science
5.1.4.1 Testing the Significant Difference between Post-test Means of the Experimental Group Students with Respect to Gender Groups in Achievement in Science

5.1.4.2 Testing the Significant Difference between Post-test Means of the Experimental Group Students with Respect to Gender Groups in Creative Thinking

5.1.4.3 Testing the Significant Difference between Post-test Means of the Experimental Group Students with Respect to Gender Groups in Attitude towards Science

5.1.5 Testing the Relationship among Achievement in Science, Creative Thinking and Attitude towards Science of the Experimental Group Students

5.2 Qualitative Analysis of the Results

5.2.1 Analysis of the Students’ Reactions towards Dimensions of Learning Model

5.3 Discussion of the Results of the Study

CHAPTER VI SUMMARY, EDUCATIONAL IMPLICATIONS, RECOMMENDATIONS AND SUGGESTIONS

6.0 Introduction

6.1 Rationale and Significance of the Study

6.2 Statement of the Problem

6.3 Delimitation of the Study

6.4 Methodology of the Study

6.4.1 Preparation and Developmental Phase

6.4.1.1 Objectives of the Study

6.4.1.2 Hypotheses of the Study

6.4.1.3 Variables Used in the Study

6.4.1.4 Operational Definitions of the Key Terms

6.4.1.5 Selection of the Dimensions of Learning Model for the Study
6.4.1.6 Selection of Content 160
6.4.1.7 Preparation of the Instructional Material based on Dimensions of Learning Model 160
6.4.1.8 Pilot Study of the Instructional Material based on Dimensions Learning Model 160

6.4.2 Experimentation of the Study 161
6.4.2.1 Design of the Study 161
6.4.2.2 Sampling Procedure 161
6.4.2.3 Sample for the Study 161
6.4.2.4 Homogenizing the Groups 162
6.4.2.5 Tools used in the Study 162
6.4.2.6 Implementation of Intervention Program 163
6.4.2.6.1 Administration of Pre-tests 163
6.4.2.6.2 Intervention Program 164
6.4.2.6.3 Administration of Pre-tests 164
6.4.2.6.4 Data Analysis and Statistical Techniques Used 164

6.5 Major Findings of the Study 165
6.6 Educational Implications of the Study 166
6.7 Recommendations 167
6.8 Suggestions for Further Research 168
6.9 Conclusions 169
