CONTENTS

CHAPTERS

1. INTRODUCTION
   1.1 FLORICULTURE AND FLORISTRY
      1.1.1 Definition
      1.1.2 Floriculture as industry
      1.1.3 Floriculture products
      1.1.4 Cut flowers – an important floricultural product
   1.2 POST HARVEST AND SHELF LIFE
   1.3 SENESCENCE
   1.4 PRESENT STUDY AND OBJECTIVES

2. REVIEW OF LITERATURE
   2.1 SENESCENCE
      2.1.1 Definition
      2.1.2 Senescence and Aging
      2.1.3 Senescence and PCD
      2.1.4 Types of Senescence
      2.1.5 Patterns of Senescence
      2.1.6 Mechanism of Senescence (Theories)
      2.1.7 Factors affecting senescence
   2.2 FLOWER SENESCENCE
      2.2.1 Petal Senescence
         2.2.1.1 Ultrastructural changes
         2.2.1.2 Biochemical changes
         2.2.1.3 Metabolic changes
            2.2.1.3.1 Carbohydrate Metabolism
            2.2.1.3.2 Protein Metabolism
         2.2.1.4 Pigmentation Changes
      2.2.2 Senescence and Membrane Integrity
      2.2.3 Hormones and Senescence
         2.2.3.1 Ethylene
      2.2.4 Pollination, Ethylene and Senescence
   2.3 POST HARVEST PHYSIOLOGY
      2.3.1 Physiological changes
      2.3.2 Ultrastructural and Biophysical changes
      2.3.3 Biochemical changes
      2.3.4 Changes in pigmentation
      2.3.5 Changes in Vascular Morphology
      2.3.6 Factors affecting Longevity
         A. Pre-harvest Factors
         B. Harvest Factors
C. Post-harvest Factors

2.3.7 Treatments for improving longevity of cut flowers

A. Physical treatments
B. Chemical treatments

2.3.8 Various chemical preservatives in keeping quality of cut flowers

3. MATERIAL AND METHODS

3.1 PLANT MATERIAL

3.2 METHODOLOGY

3.2 A Field Study and Growth Analysis
3.2 B Post-Harvest study
3.2 C Study of physiological and biochemical changes.

3.2 C I Estimations for Carbohydrate Metabolism
1. Reducing and Total Sugars
2. Invertase Activity
3. Starch
4. Amylase Activity

3.2 C II Estimations for Protein Metabolism
1. Total Protein
2. Enzyme Protein
3. Protease
4. Free Amino Acids

3.2 C III Estimations for Oxidising Enzyme and Phenolic Compound
1. IAA Oxidase
2. Total Phenols

3.2 C IV Estimations for Antioxidant Enzymes
1. Peroxidase
2. Polyphenol Oxidase
3. Catalase

3.2 C V Estimations for Electrolyte Leakage (%)

4. RESULTS & DISCUSSION

4 A Results obtained during Field Study (Growth Data)
4 B Post-Harvest study

4B-1: Summary of the results of different post harvest experiments
4B-2: Results of Experiments with DW as holding solution

4 C Results of Physiological and Biochemical Studies
4C-I: From Uncut Flower Petals (Senescence-on the plant)
4C-I.1 Carbohydrate Metabolism
4C-I.1.1 Sugars
4C-I.1.1.1 : Total Sugars
4C-I.1.1.2 : Reducing Sugars
4C-I.1.1.3 : Non-Reducing Sugars
4C-I.1.2 : Invertase
4C-I.1.3 : Starch
4C-I.1.4 : Amylase
4C-I.2 Protein Metabolism
  4C-I.2.1 : Total Protein
  4C-I.2.2 : Enzyme Protein
  4C-I.2.3 : Protease
  4C-I.2.4 : Free Amino Acids
4C-I.3 Oxidizing Enzyme and Phenolic Compounds
  4C-I.3.1 : IAA Oxidase
  4C-I.3.2 : Total Phenols
4C-I.4 Antioxidant Enzymes
  4C-I.4.1 : Peroxidase
  4C-I.4.2 : Polyphenol Oxidase
  4C-I.4.3 : Catalase
4C-I.5 : Electrolyte leakage and Electrolyte Conductivity (EC)

4C-II : From Cut Flower Petals
  (After Harvest-post harvest shelf life)
  4C-II.1 Carbohydrate Metabolism
    4C-II.1.1 Sugars
      4C-II.1.1.1 : Total Sugars
      4C-II.1.1.2 : Reducing Sugars
      4C-II.1.1.3 : Non-Reducing Sugars
    4C-II.1.2 : Invertase
    4C-II.1.3 : Starch
    4C-II.1.4 : Amylase
  4C-II.2 Protein Metabolism
    4C-II.2.1 : Total Protein
    4C-II.2.2 : Enzyme Protein
    4C-II.2.3 : Protease
    4C-II.2.4 : Free Amino Acids
  4C-II.3 Oxidizing Enzyme and Phenolic Compounds
    4C-II.3.1 : IAA Oxidase
    4C-II.3.2 : Total Phenols
  4C-II.4 Antioxidant Enzymes
    4C-II.4.1 : Peroxidase
    4C-II.4.2 : Polyphenol Oxidase
    4C-II.4.3 : Catalase
  4C-II.5 : Electrolyte leakage and Electrolyte Conductivity (EC)

4C-III : Comparison of Results of physiological and biochemical studies from Uncut and Cut Flower Petals:
  4C-III.1 Carbohydrate Metabolism
    4C-III.1.1 Sugars
LIST OF TABLES

Table – 1 : India’s Floriculture Exports : Product wise share and growth in Exports (decadal average for the period 1996-97 to 2005-06)

Table 4A-1 : Growth Data taken during the season.

Table 4A-2 : Fresh weight (in gm per plant) of different plant organs.

Table 4A-3 : Dry weight (in gm per plant) of different plant organs.

Table 4A-4 : Showing the RELATIVE GROWTH RATE (R.G.R.) of *Cosmos bipinnatus* during Field Work.

Table 4A-5 : Showing the LEAF WEIGHT RATIO (L.W.R.) and NET ASSIMILATION RATE (N.A.R.) of *Cosmos bipinnatus* during Field Work.

Table 4A-6 : Shows the Maximum Temperature in °C, Minimum Temperature in °C, Relative Humidity in % and Photoperiod in hours during the study.

Table 4B-1 : Summary Table showing the results of different post harvest experiments.

Table 4B-2.1 Shows the FRESH WEIGHT of *Cosmos bipinnatus* during POST HARVEST STUDY
Table 4B-2.2 Shows the FRESH WEIGHT of *Cosmos bipinnatus* expressed as % of original fresh weight during POST HARVEST STUDY

Table 4B-2.3 Shows the LENGTH OF PEDICEL (STALK) of *Cosmos bipinnatus* expressed as % of original length during POST HARVEST STUDY

Table 4B-2.4 Shows the WATER UPTAKE of *Cosmos bipinnatus* during POST HARVEST STUDY

Table 4B-2.5 Shows the TRANSPIRATION LOSS of *Cosmos bipinnatus* during POST HARVEST STUDY

Table 4B-2.6 Shows the WATER BALANCE of *Cosmos bipinnatus* during POST HARVEST STUDY

Table 4B-2.7 Shows the Total water uptake, Total transpiration loss, Total water balance in gram per flower & Shelf life in days of *Cosmos bipinnatus* during POST HARVEST STUDY

Table 4C-1.1.1.1a : Total Sugars (in mg / g dry petals) in uncut flower petals

Table 4C-1.1.1.1b ANOVA Summary Table for Total Sugars in uncut flower petals

Table 4C-1.1.1.2a : Reducing Sugars (in mg / g dry petals) in uncut flower petals

Table 4C-1.1.1.2b ANOVA Summary Table for Reducing Sugars in uncut flower petals

Table 4C-1.1.1.3a : Non-Reducing Sugars (in mg / g dry petals) in uncut flower petals

Table 4C-1.1.1.3b ANOVA Summary Table for Non-reducing Sugars in uncut flower petals

Table 4C-1.1.2a : Invertase activity (in mg reducing sugars produced / g fresh petals) in uncut flower petals

Table 4C-1.1.2b ANOVA Summary Table for Invertase Activity in uncut flower petals

Table 4C-1.1.3a : Starch (in mg / g dry petals) in uncut flower petals

Table 4C-1.1.3b ANOVA Summary Table for Starch in uncut flower petals

Table 4C-1.1.4.1a : Amylase activity (starch reduced in mg / g fresh petals) in uncut flower petals

Table 4C-1.1.4.1b ANOVA Summary Table for Amylase activity in uncut flower petals
Table 4C-I.4.2a : α-Amylase activity (starch reduced in mg / g fresh petals) in uncut flower petals

Table 4C-I.4.2b ANOVA Summary Table for α-Amylase activity in uncut flower petals

Table 4C-I.2.1a : Total Protein (in mg / g fresh petals) in uncut flower petals

Table 4C-I.2.1b ANOVA Summary Table for total protein content in uncut flower petals

Table 4C-I.2.2a : Enzyme Protein (in mg / g fresh petals) in uncut flower petals

Table 4C-I.2.2b ANOVA Summary Table for enzyme protein in uncut flower petals

Table 4C-I.2.3a : Protease activity (in mg / g fresh petals) in uncut flower petals

Table 4C-I.2.3b ANOVA Summary Table for protease activity in uncut flower petals

Table 4C-I.2.4a : Free Amino Acids (in mg / g dry petals) in uncut flower petals

Table 4C-I.2.4b ANOVA Summary Table for Free Amino Acids in uncut flower petals

Table 4C-I.3.1a : IAA Oxidase activity (in mg / g fresh petals) in uncut flower petals

Table 4C-I.3.1b ANOVA Summary Table for IAA Oxidase activity in uncut flower petals

Table 4C-I.3.2a : Total Phenols (in mg / g dry petals) in uncut flower petals

Table 4C-I.3.2b ANOVA Summary Table for Total Phenols in uncut flower petals

Table 4C-I.4.1a : Peroxidase activity (in ΔO.D./min/gm fresh petals) in uncut flower petals

Table 4C-I.4.1b ANOVA Summary Table for Peroxidase activity in uncut flower petals

Table 4C-I.4.2a : Polyphenol oxidase activity (in ΔO.D./min/gm fresh petals) in uncut flower petals

Table 4C-I.4.2b ANOVA Summary Table for Polyphenol Oxidase activity in uncut flower petals

Table 4C-I.4.3a : Catalase activity (in ml H2O2 broken down per gram fresh petals) in uncut flower petals

Table 4C-I.4.3b ANOVA Summary Table for Catalase activity in uncut flower petals
Table 4C-I.5: Electrolyte Leakage (% of total conductance following petal destruction) in uncut flower petals

Table 4C-II.1.1.1.a: Total Sugars (in mg / g dry petals) in cut flower petals

Table 4C-II.1.1.1b ANOVA Summary Table for Total Sugars in cut flower petals

Table 4C-II.1.1.2.a: Reducing Sugars (in mg / g dry petals) in cut flower petals

Table 4C-II.1.1.2b ANOVA Summary Table for Reducing Sugars in cut flower petals

Table 4C-II.1.1.3.a: Non-Reducing Sugars (in mg / g dry petals) in cut flower petals

Table 4C-II.1.1.3b ANOVA Summary Table for Non-reducing Sugars in cut flower petals

Table 4C-II.1.2.a: Invertase (in mg reducing sugars produced / g dry petals) in cut flower petals

Table 4C-II.1.2b ANOVA Summary Table for Invertase Activity in cut flower petals

Table 4C-II.1.3.a: Starch (in mg / g dry petals) in cut flower petals

Table 4C-II.1.3b ANOVA Summary Table for Starch in cut flower petals

Table 4C-II.1.4.1.a: Amylase activity (starch reduced in mg / g fresh petals) in cut flower petals

Table 4C-II.1.4.1b ANOVA Summary Table for Amylase activity in cut flower petals

Table 4C-II.1.4.2.a: α-Amylase activity (starch reduced in mg / g fresh petals) in cut flower petals

Table 4C-II.1.4.2b ANOVA Summary Table for α-Amylase activity in cut flower petals

Table 4C-II.2.1.a: Total Protein (in mg / g fresh petals) in cut flower petals

Table 4C-II.2.1b ANOVA Summary Table for total protein content in cut flower petals

Table 4C-II.2.2.a: Enzyme Protein (in mg / g fresh petals) in cut flower petals

Table 4C-II.2.2b ANOVA Summary Table for enzyme protein in cut flower petals

Table 4C-II.2.3.a: Protease activity (in mg / g fresh petals) in cut flower petals

Table 4C-II.2.3b ANOVA Summary Table for protease activity in cut flower petals
Table 4C-II.2.4a : Free Amino Acids (in mg / g dry petals) in cut flower petals

Table 4C-II.2.4b ANOVA Summary Table for Free Amino Acids in cut flower petals

Table 4C-II.3.1a : IAA Oxidase activity (in mg / g fresh petals) in cut flower petals

Table 4C-II.3.1b ANOVA Summary Table for IAA Oxidase activity in cut flower petals

Table 4C-II.3.2a : Total Phenols (in mg / g dry petals) in cut flower petals

Table 4C-II.3.2b ANOVA Summary Table for Total Phenols in cut flower petals

Table 4C-II.4.1a : Peroxidase activity (in Δ O.D./min/g fresh petals) in cut flower petals

Table 4C-II.4.1b ANOVA Summary Table for Peroxidase activity in cut flower petals

Table 4C-II.4.2a Polyphenol oxidase activity (in Δ O.D./min/g fresh petals) in cut flower petals

Table 4C-II.4.2b ANOVA Summary Table for Polyphenol Oxidase activity in cut flower petals

Table 4C-II.4.3a Catalase activity (in ml H₂O₂ reduced /g fresh petals) in cut flower petals

Table 4C-II.4.3b ANOVA Summary Table for Catalase activity in cut flower petals

Table 4C-II.5 : Electrolyte Leakage (% of total conductance following petal destruction) in cut flower petals

**LIST OF FIGURES**

Figure – 1 Sequence of events causing loss of membrane integrity during senescence.

Figure -A1 Growth Data during the season

Figure-A2 Fresh weight in gm per plant of different plant parts

Figure-A3 Dry weight in gm per plant of different plant parts

Figure-A4 Relative Growth Rate (R.G.R.) of *Cosmos bipinnatus* during Field Work

Figure-A5 LEAF WEIGHT RATIO (L.W.R.) and NET ASSIMILATION RATE (N.A.R.) of *Cosmos bipinnatus* during Field Work
Figure-A6 shows the average TEMPERATURE, average RELATIVE HUMIDITY and average PHOTOPERIOD during the field work.

Figure –B-2.1 : Fresh weight of three varieties

Figure –B-2.2 : Fresh weight of three varieties expressed as % of original fresh weight

Figure –B-2.3 : Pedicel length expressed as % of original pedicel length

Figure –B-2.4 : Water uptake in three varieties

Figure –B-2.5 : Transpiration loss in three varieties

Figure –B-2.6 : Water Balance in three varieties

Figure-B-2.7 : Total Water uptake, transpiration loss, water balance and shelf life of three varieties

Figure-C-1.1.1.1 : shows the total sugars in mg per gm dry petals of uncut flowers

Figure-C-1.1.1.2 : shows the reducing sugars in mg per gm dry petals of uncut flowers

Figure-C-1.1.1.3 : shows the non-reducing sugars in mg per gm dry petals of uncut flowers

Figure-C-1.1.2 : shows the invertase activity per gm fresh flower petals in uncut flowers

Figure-C-1.1.3 : shows the starch in mg per gm dry petals of uncut flowers

Figure-C-1.1.4.1 : shows the amylase activity in uncut flowers

Figure-C-1.1.4.2 : shows the α-amylase activity in uncut flowers

Figure-C-1.2.1 : shows the total protein content in mg per gm fresh flower petals

Figure-C-1.2.2 : shows the enzyme protein per gm fresh petals

Figure-C-1.2.3 : shows the protease activity in uncut flower petals

Figure-C-1.2.4 : shows the mg free amino acids per gm dry petals of uncut Cosmos flowers

Figure-C-1.3.1 : shows the IAA Oxidase activity in uncut flower petals

Figure-C-1.3.2 : shows the mg total phenols per gram dry petals of uncut flowers
Figure-C-1.4.1 : shows the Peroxidase activity in uncut flower petals
Figure-C-1.4.2 : shows the Polyphenol oxidase activity in uncut flowers
Figure-C-1.4.3 : shows the Catalase activity in uncut flower petals
Figure-C-1.5 : shows the Electrolyte Leakage in three varieties under uncut conditions
Figure-C-II.1.1.1 : shows the total sugars in cut flowers
Figure-C-II.1.1.2 : shows the mg reducing sugars per gram dry petals of cut flowers
Figure-C-II.1.1.3 : shows the non-reducing sugars per gram dry petals of cut flowers
Figure-C-II.1.2 : shows the invertase activity in cut flowers
Figure-C-II.1.3 : shows the starch in cut flowers
Figure-C-II.1.4.1 : shows the total amylase activity in cut flower petals
Figure-C-II.1.4.2 : shows α-amylase activity in cut flower petals
Figure-C-II.2.1 : shows the total protein content in cut flower petals
Figure-C-II.2.2 : shows the enzyme protein in cut flowers
Figure-C-II.2.3 : shows the protease activity in cut flower petals
Figure-C-II.2.4 : shows the free amino acids in cut flower petals
Figure-C-II.3.1 : shows the IAA Oxidase activity in cut flower petals
Figure-C-II.3.2 : shows the total phenols in cut flower petals
Figure-C-II.4.1 : shows the Peroxidase activity in cut flower petals
Figure-C-II.4.2 : shows the Polyphenol oxidase activity in cut flower petals
Figure-C-II.4.3 : shows the catalase activity in cut flower petals
Figure-C-II.5 : Electrolyte Leakage in three varieties under cut conditions
Figure-C-III.1.1.1a : shows amount of total sugars in white variety
Figure-C-III.1.1.1b : shows amount of total sugars in pink variety
Figure-C-III.1.1.1.c: shows amount of total sugars in crimson variety
Figure-C-III.1.1.2.a: shows amount of reducing sugars in white variety
Figure-C-III.1.1.2.b: shows amount of reducing sugars in pink variety
Figure-C-III.1.1.2.c: shows amount of reducing sugars in crimson variety
Figure-C-III.1.1.3.a: shows amount of non-reducing sugars in white variety
Figure-C-III.1.1.3.b: shows amount of non-reducing sugars in pink variety
Figure-C-III.1.1.3.c: shows amount of non-reducing sugars in crimson variety
Figure-C-III.1.2.a: shows invertase activity in white variety
Figure-C-III.1.2.b: shows invertase activity in pink variety
Figure-C-III.1.2.c: shows invertase activity in crimson variety
Figure-C-III.1.3.a: shows the amount of starch in white variety
Figure-C-III.1.3.b: shows the amount of starch in pink variety
Figure-C-III.1.3.c: shows the amount of starch in crimson variety
Figure-C-III.1.4.a: shows total amylase activity in white variety
Figure-C-III.1.4.b: shows total amylase activity in pink variety
Figure-C-III.1.4.c: shows total amylase activity in crimson variety
Figure-C-III.1.4.d: shows α-amylase activity in white variety
Figure-C-III.1.4.e: shows α-amylase activity in pink variety
Figure-C-III.1.4.f: shows α-amylase activity in crimson variety
Figure-C-III.2.1.a: shows total protein in white variety
Figure-C-III.2.1.b: shows total protein in pink variety
Figure-C-III.2.1.c: shows total protein in crimson variety
Figure-C-III.2.2.a: shows the enzyme protein in white variety
Figure-C-III.2.2b : shows the enzyme protein in pink variety
Figure-C-III.2.2c : shows the enzyme protein in crimson variety
Figure-C-III.2.3a : shows the protease activity in white variety
Figure-C-III.2.3b : shows the protease activity in pink variety
Figure-C-III.2.3c : shows the protease activity in crimson variety
Figure-C-III.2.4a : shows the free amino acids in white variety
Figure-C-III.2.4b : shows the free amino acids in pink variety
Figure-C-III.2.4c : shows the free amino acids in crimson variety
Figure-C-III.3.1a : shows the IAA Oxidase activity in white variety
Figure-C-III.3.1b : shows the IAA Oxidase activity in pink variety
Figure-C-III.3.1c : shows the IAA Oxidase activity in crimson variety
Figure-C-III.3.2a : shows the total phenols in white variety
Figure-C-III.3.2b : shows the total phenols in pink variety
Figure-C-III.3.2c : shows the total phenols in crimson variety
Figure-C-III.4.1a : shows the Peroxidase activity in white variety
Figure-C-III.4.1b : shows the Peroxidase activity in pink variety
Figure-C-III.4.1c : shows the Peroxidase activity in crimson variety
Figure-C-III.4.2a : shows the Polyphenol oxidase activity in white variety
Figure-C-III.4.2b : shows the Polyphenol oxidase activity in pink variety
Figure-C-III.4.2c : shows the Polyphenol oxidase activity in crimson variety
Figure-C-III.4.3a : shows the catalase activity in white variety
Figure-C-III.4.3b : shows the catalase activity in pink variety
Figure-C-III.4.3c : shows the catalase activity in crimson variety
Figure-C-III.5a: Electrolyte Leakage in white variety
Figure-C-III.5b: Electrolyte Leakage in pink variety
Figure-C-III.5c: Electrolyte Leakage in crimson variety

LIST OF PLATES

PLATE-1A  Showing the flower twig of *Cosmos bipinnatus* Cav.

PLATE-1B  Shows the flowering twigs of various cultivar varieties of *Cosmos bipinnatus*

PLATE – 2A  Shows various stages of *Cosmos bipinnatus* Cvar. Sonata Series, ‘Sonata White’ Uncut flowers

PLATE – 2B  Shows various stages of *Cosmos bipinnatus* Cvar. Sonata Series, ‘Sonata Pink’ Uncut flowers

PLATE – 2C  Shows various stages of *Cosmos bipinnatus* Cvar. Sonata Series, ‘Sonata Carmine’ (Crimson) Uncut flowers

PLATE – 3A  Shows various stages of *Cosmos bipinnatus* Cvar. Sonata Series, ‘Sonata White’ Cut flowers

PLATE – 3B  Shows various stages of *Cosmos bipinnatus* Cvar. Sonata Series, ‘Sonata Pink’ Cut flowers

PLATE – 3C  Shows various stages of *Cosmos bipinnatus* Cvar. Sonata Series, ‘Sonata Carmine’ (Crimson) Cut flowers

PLATE – 4  Shows the growth of the plants after 29 and 90 days of sowing.
