ACKNOWLEDGEMENT

The studies embodied in this thesis were undertaken at the National Institute of Occupational Health, (ICMR), Ahmedabad, India. The author gratefully acknowledges the kind permission given by Dr. S.K.Kashyap, Ex. Director, and Dr. H.N. Saiyed, Director of the Institute, for giving permission to undertake the studies in the institute.

With deep admiration and indebtedness, the author expresses profound gratitude to Dr. P.K. Nag, Deputy Director, Head of the Occupational Physiology Division of the Institute for his expert and valuable guidance and constant encouragement, appreciation, patience, and constructive criticism throughout the process of preparing this work.

The good wishes and valuable suggestions and moral support, especially of Dr. Anjali Nag, SRO of the Occupational Physiology Division, and Dr. Asis Goswami, Sports Authority of India, Gandhinagar, are respectfully acknowledged.

The author also expresses his gratitude to the following individuals for their splendid cooperation during the laboratory studies and continual moral support, namely, Shri P.Bandyopadhyay, Mrs. Dipti Kothari, Shri M.S. Vaghela,
Mrs. Hina Desai, Shri B.B. Patel, and Ms. Bina Shah. An expression of gratitude is also extended to Mrs. Ketki Bhatia, Librarian, for her valuable assistance.

Above all, the author expresses his sincere thanks to the subjects, without whose persistent co-operation, the present work would not have been possible.

Last but far from the least, I would like to express my love and gratitude to my wife, parents, and sisters for their constant inspiration, encouragement and loving support.

Ashtekar Shirish Pratap
