# List of Figures

1.1 Antenna as a transition device. 
1.2 Evolution of dipole antenna. 
1.3 Prototype of dipole antenna. 
1.4 (a) Model of monopole antenna and (b) Prototype of monopole antenna. 
1.5 (a) Model of Helix antenna (b) Helix antenna in Ericson mobile phone. 
1.6 Patch Antenna. 
1.7 Different Configuration of Microstrip antennas. 
1.8 PIN diode. 
1.9 Symbol for PIN diode. 
1.10 Simple switch equivalent circuit ON state and OFF state. 
1.11 Symbol of varactor diode. 
1.12 Equivalent circuit for a varactor diode. 
1.13 Yee cell. 
1.14 Patch antenna with microstrip feed line. 
1.15 Probe fed microstrip patch antenna. 

3.1 General two port network with associated parameter. 
3.2 General two port correction into calibration section. 
3.3 General two port correction into calibration section. 
3.4 Sub systems of a network analyzer. 
3.5 Block diagram of vector network analyzer. 
3.6 Schematic view of signal processing. 
3.7 The photography of Vector Network Analyzer (VNA).
LIST OF FIGURES

3.8 Radiation pattern measurement system. .......................... 68
3.9 Measurement setup for return loss using VNA. ............ 69
3.10 Radiation measurement setup using VNA. .................. 69

4.1 Structure of microstrip patch antenna. ....................... 85
4.2 (a) Geometry of conventional patch antenna (b) Fabricated view of antenna. ................................................... 88
4.3 (a) Geometry of reconfigurable antenna with spiral slots (b) Fabricated view of antenna. .................................. 88
4.4 (a) Geometry of patch antenna (b) photograph of fabricated antenna. 89
4.5 (a) Geometry of reconfigurable antenna with one slot (b) Photograph of fabricated antenna. .......................... 90
4.6 (a) Geometry of a proposed antenna with double slot loaded with varactor diodes (b) Fabricated view of antenna. .......... 91
4.7 (a) Simulated conventional patch antenna (b) Photograph of fabricated antenna (front end). ............................. 92
4.8 Photograph of antenna ground plane with probe feed (back view). 92
4.9 (a) Simulated geometry of Two slot antenna (b) Photograph of fabricated antenna. ................................. 93
4.10 (a) Simulated geometry of antenna with four slots (b) Photograph of antenna. .................................................. 93
4.11 (a) simulated geometry of proposed antenna with multi slots (b) Photograph of fabricated antenna. .................... 94
4.12 (a) Simulated geometry of proposed antenna with multi slots loaded with one varactor diode (b) Photograph of fabricated antenna. 95
4.13 (a) Simulated geometry of proposed antenna with multi slots loaded with two varactor diode (b) Photograph of fabricated antenna. 96
4.14 (a) simulated geometry of rombus shape patch antenna (b) Photography of fabricated antenna. ....................... 97
4.15 (a) Simulated geometry of proposed antenna with BW=1mm (b) Photograph of fabricated antenna. ..................... 98
4.16 (a) Simulated geometry of proposed antenna with BW=2mm (b) Photography of fabricated antenna. ..................... 99

    1.18 GHz frequency .............................................. 136
5.17 (a) Radiation pattern of the antenna at 2.8 GHz at 90° (b) at 180°. 136
5.18 (a) Simulated return loss characteristics of conventional antenna
    (b) Measured return loss ........................................... 138
5.19 Simulated return loss characteristics of proposed antenna BW=1mm.139
5.20 Measured return loss characteristics of proposed antenna BW=1mm.140
5.21 Simulated return loss characteristics of proposed antenna BW=2mm.141
5.22 Measured return loss characteristics of proposed antenna BW=2mm.141
5.23 Simulated return loss characteristics of proposed antenna BW=2mm
    and 1D. ........................................................... 142
5.24 Measured return loss characteristics of proposed antenna BW=2mm
    and 1D. ........................................................... 142
5.25 Measured return loss characteristics of proposed antenna with BW=2mm
    and 2D. ........................................................... 143
5.26 Measured return loss characteristics of proposed antenna with BW=2mm
    and 3D. ........................................................... 144
LIST OF FIGURES

5.27 (a) Radiation pattern for proposed antenna (BW=2mm, one diode, 1.1 GHz) at 90° (b) at 180°. ........................................... 145
5.28 (a) Radiation pattern for proposed antenna (BW=2mm, one diode, 1.1 GHz) at 90° (b) at 180°. ........................................... 145
5.29 (a) Radiation pattern for proposed antenna (BW=2mm, one diode, 1.4 GHz) at 90° (b) at 180°. ........................................... 146
5.30 Radiation pattern for proposed antenna for 1.7 GHz 180°. .......... 146
5.31 Simulated 3D view pattern of proposed antenna. ..................... 148
5.32 Return loss characteristics of reference antenna. ..................... 149
5.33 (a) Simulated return loss characteristics of E-slot antenna (b) Measured RL. ................................................................. 150
5.34 (a) Simulated return loss characteristics of E-slot antenna with one capacitor (b) Measured return loss. ............................... 150
5.35 (a) Return loss characteristics of E-slot antenna with two capaci-
(b) Measured return loss. ...................................................... 151
5.36 Radiation pattern for proposed E-slot antenna (a) at 90° (b) at 180°. 152
5.37 Radiation pattern for proposed E-slot antenna with one capacitor at 2.14 GHz frequency (a) at 90° (b) at 180°. ....................... 152
5.38 VSWR for Reconfigurable E-slot antenna. ............................... 153
5.39 Simulated 3D view pattern of proposed E-slot antenna with one capacitor. ................................................................. 153
5.40 Simulated 3D view pattern of proposed E-slot antenna with two capacitors. ................................................................. 154
5.41 (a) Simulated return loss characteristics of three slot antenna (b) Measured RL ................................................................. 156
5.42 (a) Simulated return loss characteristics of five slot antenna (b) Measured RL ................................................................. 156
5.43 (a) Simulated return loss characteristics of five slot with 1C (b) Measured RL ................................................................. 157
5.44 (a) Simulated return loss characteristics of five slot with 2C (b) Measured RL ................................................................. 157
5.45 Simulated VSWR of proposed multi slot antenna. ..................... 159
