Acknowledgments

It is a pleasure to pay tribute to one and all who provided me unflinching encouragement and support in various ways to complete my research work. It is my first and foremost duty to express my heart-felt gratitude to my esteemed guide and supervisor Prof. Dr. K. K. Suresh, Professor and Head, Department of Statistics, Bharathiar University, Coimbatore. I am extremely fortunate to have a noble, motivating, knowledgeable and sincere guide like him. Though he is ever busy with numerous activities, he found time to encourage me with critical and creative thoughts. It is his timely help, unfailing courtesy and encouragement, that enabled me to submit the thesis in time. His enthusiasm and perseverance have always been inspiring.

I wish to place on record my sincere gratitude to my former guide Dr. Maya T. Nair, Assistant Professor, Department of Statistics, Bharathiar University, Coimbatore, for having initiated me into the world of reliability theory and survival analysis. She has been a source of strength and inspiration to me in all the phase of this research. Her untiring effort in the accomplishment of the thesis is price worthy. Her advises and suggestions are memorable.

I owe my gratitude to the faculty members of the Department of Statistics Dr. R. Vijayaraghavan, Associate Professor, Dr. R. Jaisankar, Reader, Mr. K. M. Sakthivel, Assistant Professor, Dr. R. Muthukrishnan, Assistant Professor, Mr. V. Kaviyarasu, Assistant Professor, Dr. K. Pradeepa Veerakumari, Assistant Professor for their constant support towards completion of this research work.

I would like to express my sincere thanks to the authorities of Bharathiar Uni-
iversity for giving me the valuable opportunity to do this investigation and providing necessary facilities all the time.

I am very much grateful to Mr. N. Rathimaran, Assistant Technical Officer to give me a moral support in preparing this thesis and Office staff Mr. M. Velusamy, Assistant, Mrs. S. Savithri, Department of Statistics, Bharathiar University, Coimbatore, for their constant encouragement towards completion of this research work.

Special mention should be made regarding my fellow Ph.D and M.Phil research scholars, who with their infectious optimism, cheerful attitude and sense of humour, emboldened me to take things in their stride and transformed the gravity of research atmosphere into a pleasant and memorable experience. My heartfelt thanks to each and every one of them.

I would like to thank Mr. S. Gandhiya Vendhan, Mr. K. Mahesh, Ph.D research scholars, Department of Statistics and Dr. B. Radhakrishnan, Department of Mathematics for their help and co-operation towards preparing this thesis.

In this time, proudly I extend a bouquet of respect to all my teachers who evinced me the love for the subject. My special thanks to lot of friends who have helped me during the time of research in different ways. The University Research Fellowship (URF) extended from Bharathiar University to pursue my research is duly acknowledged.

I wish to place on record my profound feelings of gratitude and hearty thanks to my family members for their constant support and encouragement during this investigation of my research work. I sincerely acknowledge the reviewers and editors of different journals, for accepting and publishing articles produced out of this research work. These publications have really encouraged in carrying out this research work.

May I surrender all the efforts and the fruits there off at the feet of God almighty for thy blessings. For any errors or inadequacies that may remain in this work, the entire responsibility belongs to me.

Abdul Saleem. E
