ACKNOWLEDGEMENTS

I have a profound privilege in extending my deep and sincere gratitude to my revered teacher, Dr. K. C. Pandey, Prof. and Head, Department of Zoology, Institute of Advanced Studies, Meerut University, Meerut for his expert guidance, close supervision, stimulating counsel, sustained interest, and constant encouragement which he induced in me throughout the progress of work. His gracious and multipronged help and facilities provided whenever these were sought cannot be acknowledged merely by words.

My thanks are also due to Dr. M. S. Dhillon, Assoc. Prof. of Botany, PAU, Ludhiana for untiring help in the identification of plants surveyed during the present work.

No words can express my thanks to my friends and relations particularly Sh. Jagmohan, Goverdhan, Jatinder Arora, Zora Singh; Mrs Harvinder, Kamal and Vasu who helped me in the collection of material or accompanied me on my collection sprees and gave their pleasant company.

The moral support, cooperation and manifold help received from my family members is also acknowledged.

In fact, the words at my command are not adequate in form or in spirit to convey my feelings of gratitude to all those who helped me directly or indirectly during the course of this work.
