CONTENTS

CHAPTER I. INTRODUCTION

1. Coordination Characteristics of Lanthanides
2. Survey of Literature on the Complexes of Lanthanides
   (A) Solid Binary Complexes
   (B) Solid Mixed Ligand Complexes
   (C) Binary Complexes in Solution
   (D) Mixed Ligand Complexes in Solution
3. Aim and Scope of the Present Work
4. References

CHAPTER II. METHODS USED IN THE PRESENT WORK

1. Methods of Determining Formation Constants of Mixed Ligand Complexes
2. Method used in the Present Work (Irving-Rossotti Approach)
   (A) Preparation of Titration Sets
   (B) Calculation of Proton-Ligand Formation Constant
   (C) Calculation of Metal-Ligand Formation Constant
3. Statistical Treatment of Data
   (A) Correlation Coefficient
   (B) Q-Test
   (C) Standard Deviation
4. Hydrolysis Correction
5. References

CHAPTER III. EXPERIMENTAL

1. Materials and Method
2. Observed Data
   (A) Ternary Systems with Catechol, 4-Methyl catechol and Pyrogallol
   (B) Ternary Systems with Resorcinol, Orcinol and Phloroglucinol

VII
(C) Ternary Systems with α-, β- and γ- Resorcylic Acids
(D) Ternary Systems with ARS, IMDA and ATP

3. Reference

CHAPTER- IV. RESULTS AND DISCUSSION

1. General Discussion
2. Stability Sequences in Different Series of Ternary Systems
   (A) Series I: Ternary Systems with Catechol, 4-Methylcatechol and Pyrogallol
   (B) Series II: Ternary Systems with Resorcinol, Orcinol and Phloroglucinol
   (C) Series III: Ternary Systems with α-, β- and γ- Resorcylic Acids
   (D) Series IV: Ternary Systems with ARS, IMDA and ATP
3. General Conclusions
4. References

CHAPTER- V. TETRAD EFFECT IN THE BINARY AND MIXED LIGAND COMPLEXES

1. Tetrad Effect in Lanthanides
2. Tetrad Effect in the Solution Stabilities of Binary and Ternary Complexes
   (A) Ternary Systems with Catechol, 4-Methylcatechol and Pyrogallol
   (B) Ternary Systems with Resorcinol, Orcinol and Phloroglucinol
   (C) Ternary Systems with α-, β- and γ- Resorcylic Acids.
   (D) Ternary Systems with ARS, IMDA and ATP
3. Mechanistic Aspects of Tetrad Effect
4. References

CHAPTER- VI. SUMMARY AND CONCLUSIONS

VIII
APPENDIX

I. Some Properties of the Lanthanides

ii

II. Structural Formulae and Proton-Ligand
Formation Constants (Literature Values)
of the Ligands

vi

III. Formation constants \( \log_{M}^{M} \) of
Lanthanide(III) Binary Chelates with
the Primary Ligands

viii

IV. mg-Equivalents of Lanthanides with
EDTA

x

V. Standard Q-Values for 90% Confidence

xii
