<tbody>
<tr>
<td>3.1</td>
<td>Place/Location wise distribution of samples.</td>
<td>47</td>
</tr>
<tr>
<td>3.2</td>
<td>Subgroup wise distribution of the samples.</td>
<td>48</td>
</tr>
<tr>
<td>3.3</td>
<td>Place/Location and subgroup wise sample size distribution of the samples</td>
<td>49</td>
</tr>
<tr>
<td>3.4</td>
<td>Subgroup wise genealogies collected distribution of the samples.</td>
<td>50</td>
</tr>
<tr>
<td>3.5</td>
<td>Subgroup wise collected samples tested for given parameters/markers.</td>
<td>51</td>
</tr>
<tr>
<td>3.6</td>
<td>Subgroup and sex wise collected samples tested for given parameters / markers.</td>
<td>52</td>
</tr>
<tr>
<td>3.7</td>
<td>Distribution of Age, Sex and subgroup wise break up of the samples.</td>
<td>53</td>
</tr>
<tr>
<td>4.1</td>
<td>Distribution of family type among Neo-Buddhist population as a whole in Nagpur city.</td>
<td>85</td>
</tr>
<tr>
<td>4.2</td>
<td>Distribution of family size among Neo-Buddhist as a whole in Nagpur city.</td>
<td>85</td>
</tr>
<tr>
<td>4.3</td>
<td>Distribution of the Neo-Buddhist population as a whole.</td>
<td>85</td>
</tr>
<tr>
<td>4.4</td>
<td>Distribution by age, sex and sex ratio in Pre-fertile, fertile and post fertile age-groups among the Neo-Buddhist population as a whole.</td>
<td>86</td>
</tr>
<tr>
<td>4.5</td>
<td>Population characterictcs of the Neo-Buddhist as a whole.</td>
<td>86</td>
</tr>
<tr>
<td>4.6</td>
<td>Total fertility and Mortality among the Neo-Buddhist subgroup.</td>
<td>87-88</td>
</tr>
<tr>
<td>4.7</td>
<td>Fertility and Mortality among the Neo-Buddhist subgroup women aged 45 years and above.</td>
<td>89</td>
</tr>
<tr>
<td>4.8</td>
<td>Percent frequency of Infant mortality and mortality among Neo-Buddhist subgroup.</td>
<td>90</td>
</tr>
<tr>
<td>4.9</td>
<td>Mortality of the first child among the Neo-Buddhist subgroup.</td>
<td>90</td>
</tr>
<tr>
<td>4.10</td>
<td>Live births and surviving children of married women in different age groups in Ladwan subgroup.</td>
<td>91</td>
</tr>
</tbody>
</table>
4.11 Live births and surviving children of married women in different age groups in Kosare subgroup.

4.12 Live births and surviving children of married women in different age groups in Barke subgroup.

4.13 Live births and surviving children of married women in different age groups in Bawne subgroup.

4.14 Live births and surviving children of married women in different age groups in Neo-Buddhist as a whole.

4.15 Mortality and survival of children among the Neo-Buddhist as a whole.

4.16 Mortality and survival of children among the Ladwan subgroup.

4.17: Mortality and survival of children among the Kosare subgroup.

4.18 Mortality and survival of children among the Bawne subgroup.

4.19 Mortality and survival of children among the Barke subgroup.

4.20 Ever pregnant and never pregnant living married women by age among Ladwan subgroup

4.21 Ever pregnant and never pregnant living married women by age among Kosare subgroup

4.22 Ever pregnant and never pregnant living married women by age among Barke subgroup

4.23 Ever pregnant and never pregnant living married women by age among Bawne subgroup

4.24 Ever pregnant and never pregnant living married women by age among Neo-Buddhist as a whole

4.25 Variables of the opportunity for natural selection among the Neo-Buddhist individual subgroup

4.26 Index of natural selection (selection intensity) among the Neo-Buddhist individual subgroup

4.27 No. of children (live-born) per months with completed fertility among some Indian population.
4.28 Indices of opportunity of natural selection in some Indian population

4.29 Distribution of women according to the age at marriage among the Neo-Buddhist subgroup.

4.30 Distribution of women according to the age at first birth among Neo-Buddhist subgroup.

4.31 Distribution of women according to the age at Menarche among the Neo-Buddhist subgroups.

4.32 Distribution of women according to the age at Menopause among the Neo-Buddhist subgroups.

4.33 Place of residence and mating pattern among Neo-Buddhist subgroup.

4.34 Distribution of Marital distance among Neo-Buddhist as a whole

4.35 Distribution of Marital distance among Bawne subgroup of Neo-Buddhist.

4.36 Distribution of Marital distance among Kosare subgroup of Neo-Buddhist.

4.37 Distribution of Marital distance among Barke subgroup Neo-Buddhist.

4.38 Distribution of Marital distance among Ladwan subgroup of Neo-Buddhist.

4.39 Temporal change in mating pattern over generations among the Bawne subgroup of Neo-Buddhist of Nagpur city.

4.40 Temporal change in mating pattern over generations among the Barke subgroup of Neo-Buddhist of Nagpur city.

4.41 Temporal change in mating pattern over generations among the Barke subgroup of Neo-Buddhist of Nagpur city.

4.42 Temporal change in mating pattern over generations among the Kosare subgroup of Nagpur city.

4.43 Temporal change in mating pattern over generations among the Ladwan subgroup of Neo-Buddhist of Nagpur city.

4.44 Mating pattern showing Endogamy Matrix among the Neo-Buddhist of Nagpur city.

4.45 Percent distribution of endogamy among Neo-Buddhist subgroup.
4.46 Percent distribution of subgroup endogamy and exogamy among Neo-Buddhist individual subgroup.

4.47 Percent distribution of admixture among the Neo-Buddhist subgroup as a Whole

4.48 No. of cross cousin marriage (consanguineous marriages) among Neo-Buddhist subgroup.

4.49 Distribution of co-efficient of inbreeding along some Indian population Comparison to present study.

4.50 Z value:-Paired sub ethnic difference in percent frequencies of endogamous Mating among Neo-Buddhist subgroup.

5.1 Sickle cell disorder distribution in different locations of Nagpur city and surrounding areas among Neo-Buddhist as a whole.

5.2 Sex-wise distribution of sickle cell disorder among Neo-Buddhist subgroup as a whole.

5.3 Distribution of Phenotype frequency of sickle cell disorder among Neo-Buddhist subgroup.

5.4 Distribution of gene frequency of sickle cell disorder among Neo-Buddhist subgroup.

5.5 Distribution of expected No. of HbS homozygote and heterozygote among Neo-Buddhist as a whole in Nagpur city.

5.6 Distribution of sickle cell disorder among earlier reported studies on Mahar / Neo- Buddhist population in Maharashtra

5.7 Frequency distribution of sickle cell disorder in all over Maharashtra.

5.8 Marriages between Normal and Heterozygote among tested samples

5.9 Age and Sex wise breakup of Neo-Buddhist samples tested for sickle cell disorder.

5.10 Distribution of 149 HbS heterozygote in the three peaks among the individual subgroup of Neo-Buddhist.

5.11 Haematological parameters in HbS heterozygote in Neo-Buddhist as a whole.
5.12 Distribution of sickle cell heterozygote (AS) quantity of Neo-Buddhist subgroup.

5.13 Distribution of sickle cell individual Homozygote (SS) of Neo-Buddhist subgroup.

5.14 Haematological parameters in Normal and HbAS traits among Neo-Buddhist as a whole

5.15 Distribution of "t" values of haematological parameters among Neo-Buddhist.

5.16 Comparison of reported HbS percent value in sickle cell heterozygote.

5.17 Distribution of HbS heterozygote in the three peaks among individual subgroup of Neo-Buddhist of Nagpur city.

5.18 Disease course among the Neo-Buddhist subgroup (available subjects) 137-141

5.19 Distribution of Individual Beta thalassaemia trait with respect to Nestroft, Haematology and A2 quantity among Neo-Buddhist subgroup.

5.20 Distribution of Phenotype frequency of Beta thalassaemia among Neo-Buddhist subgroup.

5.21 Distribution of gene frequency of beta thalassaemia among Neo-Buddhist subgroup.

5.22 Distribution of beta thalassaemia among the earlier reported studies on Mahar/Neo-Buddhist population of India.

5.23 Distribution of thalassaemia and syndromal condition among various population group of Maharashtra.

5.24 Distribution of Phenotype frequencies of G6PD enzyme deficiency among the Neo-Buddhist subgroup.

5.25 Distribution of gene frequencies of G6PD enzyme deficiency among the Neo-Buddhist subgroup.

5.26 Distribution of G6PD enzyme deficiency among the earlier reported studies on Mahar/Neo-Buddhist populations of India.

5.27 Frequency distribution of G6PD deficiency in all over Maharashtra State.
5.28 Distribution of A1A2BO blood groups phenotype frequency among Neo-Buddhist subgroups.

5.29 Distribution of A1A2BO blood groups gene frequency among Neo-Buddhist subgroups.

5.30 Distribution of A1A2BO blood groups among the earlier reported studies on Mahar/Neo-Buddhist of India.

5.31 Distribution of RhD Phenotype frequency among Neo-Buddhist subgroup.

5.32 Distribution of RhD gene frequency among Neo-Buddhist subgroup.

5.33 Distribution of 'H' blood group among the Neo-Buddhist subgroup.

5.34 Distribution of RhD blood groups among the earlier reported studies on Mahar/Neo-Buddhist population of India.

5.35 Distribution of Rh five serum Phenotype frequency among Neo-Buddhist subgroup.

5.36 Distribution of Rh five serums gene frequency among Neo-Buddhist subgroup.

5.37 Distribution of Rh five serum blood groups among the earlier reported studies on Mahar/Neo-Buddhist population of India.

5.38 Pair wise X2 homogeneity difference for all genetic loci among Neo-Buddhist subgroups.

5.39 X2 homogeneity test for A1A2BO, Rh (D), G6PD, beta thalassaemia and HbS for all subgroups.

5.40 Average heterozygocity (H) for all loci among the Neo-Buddhist subgroups.

5.41 Estimates of Neil's measure of gene diversity among four subgroups of Neo-Buddhist population after Bhasin and Khanna, 1992 for all loci. (A1A2BO, Rh (D), G6PD, Beta thalassaemia and HbS)
