GENERAL INTRODUCTION ... 1-9

PART - I

GENERAL

1. The Hosts
   i. Prunus domestica and its diseases ... 10-13
   ii. Vitis vinifera and its diseases ... 14-16

2. The Pathogens
   i. Coniella granati ... 17
   ii. Geotrichum candidum ... 17

PART - II

PATHOGENICITY

1. INTRODUCTION AND REVIEW OF LITERATURE ... 18-25

2. MATERIALS AND METHODS ... 26-32

3. RESULTS AND DISCUSSION ... 33-40
   i. Pathogenicity test
   ii. Mode of infection
   iii. Temperature and disease development
   iv. Age of culture and disease development
PART - III
STUDY OF METABOLITES

1. INTRODUCTION AND REVIEW OF LITERATURE ... 41-49
2. MATERIALS AND METHODS ... 50-56
3. RESULTS AND DISCUSSION ... 57-72
   i. Amino acids in healthy and diseased fruits
   ii. Sugars in healthy and diseased fruits
   iii. Organic acids in healthy and diseased fruits
   iv. Phenols in healthy and diseased fruits

PART - IV
ENZYMEOLOGICAL STUDIES

1. INTRODUCTION AND REVIEW OF LITERATURE ... 73-105
2. MATERIALS AND METHODS ... 106-115
3. RESULTS AND DISCUSSION ... 116-140
   i. Production of pectolytic and cellu-
      lytic enzymes in different stages of
      pathogenesis (in vivo)
   ii. Production of pectolytic and cellu-
      lytic enzymes on different culture
      media (in vitro)
   iii. Effect of native carbon sources on the
      production of pectolytic and cellu-
      lytic enzymes (in vitro)

PART - V
CONTROL MEASURES

1. INTRODUCTION AND REVIEW OF LITERATURE ... 141-156
2. MATERIALS AND METHODS ... 157-166

3. RESULTS AND DISCUSSION ... 167-202

i. Effect of antibiotics on the radial growth of the test organisms (in vitro)

ii. Effect of antibiotics on disease development (in vivo)

iii. Effect of antibiotics on the production of pectolytic and cellulolytic enzymes by the test organisms (in vivo)

iv. Effect of trace elements on the radial growth of the test organisms (in vitro)

v. Effect of trace elements on disease development (in vivo)

vi. Effect of trace elements on the production of pectolytic and cellulolytic enzymes by the test organisms (in vivo)

vii. Effect of homoeopathic drugs on the radial growth of the test organisms (in vitro)

viii. Effect of homoeopathic drugs on disease development (in vivo)

ix. Effect of homoeopathic drugs on the production of pectolytic and cellulolytic enzymes by the test organisms (in vivo)

x. Effect of leaf extracts on the radial growth of the test organisms (in vitro)

xi. Effect of leaf extracts on disease development (in vivo)
xii. Effect of leaf extracts on the production of pectolytic and cellulolytic enzymes by the test organisms (in vivo)

xiii. Effect of stem extracts on the radial growth of the test organisms (in vitro)

xiv. Effect of stem extracts on disease development (in vivo)

xv. Effect of stem extracts on the production of pectolytic and cellulolytic enzymes by the test organisms (in vivo)

xvi. Effect of edible oils on disease development (in vivo)

xvii. Effect of volatile compounds on the mycelial growth of the test organisms (in vitro)

PART - VI

GENERAL SUMMARY ... 203-217

1. LITERATURE CITED ... 218-266

2. APPENDICES I, II and III ... 267-272

3. TOTAL FIGURES 36

4. TOTAL TABLES 104
