CONTENTS

CHAPTER-I

Introduction and Definition of the Terms
Zeolite Occurrences
Classification of Zeolites
Structure of Naturally Occurring Natrolite
Dehydration and Dealumination Condition
Cation Exchange and Adsorption Property of Zeolites
References

CHAPTER-II

Scope of The Work
Applications of Zeolite
References

CHAPTER-III

Materials and Methods
Analytical Methods Used for the Investigation of the Samples
  X-ray Diffraction Method
  IR Absorption Spectroscopy
  Thermal Analysis
References
CHAPTER-IV  
Experimental Plots (FTIR, TG-DTA and X-ray Diffractograms)  
Tables of Observed Data  
Results and Discussion of Natural Zeolite and its Cation-Exchanged and Interacted Derivatives  
References

CHAPTER-V  
Experimental Plots (FTIR, TG-DTA and X-ray Diffractograms)  
Tables of Observed Data  
Results and Discussion on Pre-heated Residue of Natural Zeolite and its Cation-Exchanged and Interacted Derivatives.  
References  
Summary
