Abstract

CHAPTER-1
SECTION 1.1 : Introduction of heterocyclic compounds
1.2 : Literature survey on azoles
1-33

CHAPTER-2
SECTION 2.1 : Importance of the selected heterocycle (Carbazole), thiazoles and their azetidinones, 4-oxo-thiazolidines and their 5-arildene derivatives
2.2 : Aim and work plan of the research
34-71

CHAPTER-3
SECTION 3.1 : Synthesis of 2-aryldenylamino-5-(N^2-carbazolylmethyl)-1,3, 4-thiazoles and 1-[5-(N^2-carbazolylmethyl)-1',3',4'-thia- diazol-2'-yl]-4-(substitutedphenyl)-3-chloro-2-oxo-azetidines
3.2 : Characterisation of the synthesised compounds : 2-aryldenylamino-5-(N^2-carbazolylmethyl)-1,3,4-thiazoles and 1-[5′-(N^2-carbazolylmethyl)-1′,3′,4′thia- diazol-2′-yl]-4-(substitutedphenyl)-3-chloro-2-oxo-azetidines
72-100

CHAPTER-4
SECTION 4.1 : Synthesis of 2-(substituted aryl)-3-(N^2-carbazolylacetamidyl)-4-oxo-thiazolidines and 2-(substituted aryl)-3-(N^2-carbazolylacetamidyl)-5-(arylidene)-4-oxo-thiazolidines
4.2 : Characterisation of the synthesised compounds : 2-(substituted aryl)-3-(N^2-carbazolylacetamidyl)-4-oxo-thiazolidines and 2-(substituted aryl)-3-(N^2-carbazolylacetamidyl)-5-(arylidene)-4-oxo-thiazolidines
101-128

CHAPTER-5
SECTION 5.1 : General description of pharmacology and biological activity
5.2 : Evaluation of biological activity
5.2.1 : Evaluation of antibacterial activity
5.2.2 : Evaluation of antifungal activity
5.2.3 : Evaluation of antiinflammatory activity
5.2.4 : Evaluation of anticonvulsant activity
5.2.5 : Evaluation of diuretic activity
5.3 : Results and Conclusion
129-174
