Acknowledgements

I consider it my privilege and foremost duty to record here my deep sense of indebtedness to my supervisor Dr. O.P. Shrivastava, Reader in Chemistry, Dr. H.S. Gour Vishwavidyalaya, Sagar for his keen interest, guidance and invaluable suggestions throughout the course of this work. I owe towards him my gratitude for he not only motivated me but characteristically left no stone unturned to help me and gave me the first lesson and glimpses of real research.

I feel grateful to Prof. S.P. Banerjee, Head, Department of Chemistry, Dr. H.S. Gour Vishwavidyalaya, Sagar for furnishing all necessary research facilities and constant assistance for these investigations.

I would like to express my sincere thanks to Board of Research in Nuclear Sciences, Department of Atomic Energy, Govt. of India for the award of a fellowship under the research project "Cation Exchange Applications of Synthetic Silicate Minerals for Immobilisation and Solidification of Simulated Nuclear waste in Cement Matrix." I extend my thanks to PE & SDD, BARC for their help in carrying out various analyses.

My sincere thanks are due to my teachers and also to my colleagues engaged in research work in this department. My grateful thanks are due to the research scientists of Indian Institute of Technology (R.S.I.T.) Powai, Bombay and Regional Research Laboratory (C.S.I.R.), Bhopal for their help in the instrumental analysis of my samples.

I hope that I am not being very formal in placing on record my gratitude and regards to my beloved parents, my father-in-law and mother-in-law, my husband, my brothers Ajay and Nita and my sister Viney whose constant encouragement and affection has always been a source of inspiration and strength for me. My friends have been specially good to me through their sincere friendly support throughout and I owe to them my gratefulness.

Dated: March 6, 1995
