ACKNOWLEDGEMENTS

The author feels great pleasure while expressing his deep sense of gratitude to Dr. J.T. Rao (Assistant Professor in Chemistry, University of Sagar, Sagar (M.P.) ) under whose supervision the author could complete his work. His valuable guidance and keen interest in these investigations, encouraged the author to pursue the problem.

The author extends his heartfelt thanks to Prof. A.V. Mahajani, Head of the Department of Chemistry, University of Sagar, Sagar (M.P.), for according the necessary facilities during the conduct of this work.

Author would be failing in his duties if he does not express his appreciation and heartfelt obligation to Shri S.K. Chaturvedi and Shri S.N. Dixit, Research Scholars, Chemistry Department, University of Sagar, Sagar (M.P.) and my cousin Shri Deepak Khare and Shri Ajay Kumar Verma and my younger brother Shri Sanjay Shrivastava for their generous and substantial cooperation.

Lastly, but not the least, the author wishes to express his profound regards to his parents and Uncle (Shri Y.N. Shrivastava) whose inspirations made him to attain the completion of the work.

( A.K. Shrivastava )
