ACKNOWLEDGEMENTS

It is with a deep sense of gratitude that I would like to acknowledge Prof. D Balasubramanian. Besides being a role model, he has been a great source of inspiration as well as enthusiasm throughout the period of this work. He has taught me to think independently, added new dimensions to my ideas and provided constant encouragement which has helped me develop as an individual both scientifically and personally. I have thoroughly enjoyed my association with him in every way.

My sincere thanks to Dr. Yogendra Sharma for patiently listening to my theories and sharing my excitement during the course of the study. It has been a pleasure working with him.

I take this opportunity to thank the Director, Prof. D. Balasubramanian and the former-directors, Dr. Sharat Chandra, and Dr. P. M. Bhargava, for setting up and maintaining high standards of research at CCMB.

I acknowledge the services rendered by the staff of Animal House, Administration, Library, Stores, Drawing Office, Instrumentation Group, Photography, Bio-informatics and Fine Chemicals Groups of CCMB. I particularly thank Sekar Ramachandran and Asha Ramesh for maintaining the spectroscopic instruments in perfect condition, Seshu Prasad and Kingi for their help with nanosecond fluorimeter, Giridharan for his immaculate drawings, all the members of the Photographic Group for printing the photographs and slides, Bhaskar and Prakash for xerography. I also thank Kranti Kumar for the help rendered during my stay in the hostel. Thanks to Ramayamma International Eye Bank, L V Prasad Eye Institute, Hyderabad, for providing human corneas whenever required.

Working on West Wing First Floor has been a pleasure owing to the company of all my
labmates. I have enjoyed the scientific discussion I had with Dr Mohan Rao and Dr J Ramakrishna Murti. I am also thankful to my seniors Dr Purnananda Guptasarma and Dr Manni Luthra who always found time to listen to my problems. Srinivas has been an extremely helpful person. His friendship and concern towards my work will always be cherished. The encouragement offered by both Siwakama Sundari and Raman is greatly appreciated. Sushil has been a great help in many ways. I thank him for showing keen interest in the progress of my work and for his patient proof-reading of my manuscripts and thesis. My interaction with Ritu and Siddhartha has been pleasant. I am also grateful to Venu, Sayeed and Ehsan for being always helpful. They helped me in many ways apart from providing clean glass apparatus for my experiments. The curiosity of some of the summer students who worked in the lab during my stay has been very refreshing. The work carried out with Jayaram Hariharan has been extremely fruitful.

I thank all the students of CCMB with whom I have shared many social occasions apart from scientific discussions. I have particularly benefited from association with the "phosphatase group" comprising Nambi, Viji, Shubhangi, Srikanth and Krupa. It was fun sharing common interests with Anil. I have also enjoyed the company of Arvind, Chotu, Abhijeet, Radhika, Sujatha, Pournima, Pratik, Hari, Kakoli and George.

My father and mother have always stood by me, helping me realize my dreams. I also cherish the love and support of my grandparents, sister and brother. It is with a sense of pride that I acknowledge the support of my mother-in-law and my brothers-in-law who place education above everything. My husband has been an emotional anchor to me throughout and his constant encouragement, support and advice is greatly appreciated.

Financial support from CSIR in the form of fellowships is gratefully acknowledged.
