CHAPTER 1 INTRODUCTION 1 - 14

1.1 Introduction 1
1.2 Study area 3
  1.2.1 The South China Sea 3
  1.2.2 Hoian area 6
1.3 Objectives 10
1.4 Selection of models 10
  1.4.1 Young's model 10
  1.4.2 WAM model 11
  1.4.3 SWAN model 12
  1.4.4 Van Rijn formula 13
  1.4.5 GENESIS model 13

CHAPTER 2 LITERATURE REVIEW 15-33

2.1 Ocean winds 15
2.2 Offshore wave models 16
2.3 Nearshore wave models 19
2.4 Sediment transport 21
  2.4.1 Computation methods 21
  2.4.2 Measurement techniques 26
2.5 Shoreline change 29
3.1 Data collection and analysis
  3.1.1 Hurricane
  3.1.2 Wind
  3.1.3 Tide
  3.1.4 Current
  3.1.5 Wave
  3.1.6 Sediment transport
  3.1.7 Bathymetry
  3.1.8 Shoreline positions

3.2 Computation methods
  3.2.1 Hurricane wave
    3.2.1.1 Young's model
    3.2.1.2 SPM model
    3.2.1.3 Radius of maximum wind speed
    3.2.1.4 Design wave height
  3.2.2 Offshore wave
    3.2.2.1 Formulation of model - deep water case
    3.2.2.2 Formulation of model - shallow water case
    3.2.2.3 Numerical implementation
  3.2.3 Nearshore wave
    3.2.3.1 Action balance equation
    3.2.3.2 Wind input
    3.2.3.3 Wave energy dissipation
    3.2.3.4 Nonlinear wave-wave interactions
    3.2.3.5 Numerical implementation
  3.2.4 Sediment transport
    3.2.4.1 CERC method
    3.2.4.2 Van Rijn formula
    3.2.4.3 Net longshore sediment transport rate
  3.2.5 Shoreline change
    3.2.5.1 Governing equation for shoreline change
    3.2.5.2 Sand transport rate
    3.2.5.3 Internal wave transformation model
### CHAPTER 4 RESULTS AND DISCUSSIONS

in the Hoian area for normal conditions

4.4.2 Distribution features of wave characteristics
in the Hoian area for typical hurricane conditions

4.4.3 Comparison between measured and computed
nearshore wave characteristics

4.5 Breaker characteristics and longshore sediment transport rate

4.5.1 Variation of breaker characteristics and longshore
sediment transport rate

4.5.2 Comparison between measured and computed
vertical distribution of sediment transport rate

4.5.3 Comparison of calculated longshore sediment
transport rate using CERC and Van Rijn formulas

4.5.4 Distribution of net longshore sediment transport
rate by wave action

4.6 Shoreline change

4.6.1 Extent of erosion, deposition in and around the Thubon
River mouth during different periods from 1965 to 2001

4.6.2 Seasonal and annual changes in the shoreline in and
around the Thubon River mouth

4.6.2.1 Wet season

4.6.2.2 Dry season

4.6.2.3 Annual changes

4.6.3 Shoreline change under the influence of hurricane

4.6.4 Shoreline change under the influence of normal
wave action

4.6.5 Shoreline change in combined influence of river
flow and wave

4.6.6 Calibration/verification error of GENESIS model

4.6.7 Interpretation and prediction of shoreline changes

4.6.7.1 Interpretation of shoreline changes

4.6.7.2 Prediction of shoreline changes
CHAPTER 5    SUMMARY AND CONCLUSIONS  156-162

5.1   Summary  156
5.2  Conclusions  157
5.3  Scope for future work  162
