List of Tables

Table 2.1 The simulated wave climate for the monthly and seasonal wave fields in the Bay of Bengal after Swain (1997).

Table 2.2 The catchments area and the load characteristic of the Major rivers draining into the Bay of Bengal.

Table 3.1 Principal 'd' spacing used for various clays groups.

Table 3.2 The age model for core 31/11.

Table 3.3 The age model for core 72/1.

Table 4.1. Weighted percent of sand silt and clay grades in cores.

Table 4.2. Composition of component abundant >63 μm size in the cores.

Table 4.3. Abundance of individual clays in the cores of the study area.

Table 5.1 Temporal variations of δ¹⁸O in G. sacculifer and G. ruber in core 31/11 and 72/1.

Table 5.2 The Organic carbon and CaCO₃ variations in the cores.
