ACKNOWLEDGMENTS

With great pleasure I record my sincere gratitude to Dr. Rajiv Nigam, Scientist, National Institute of Oceanography (NIO), for his instinctive support, encouragement and able guidance during the course of this work in the fascinating field of foraminiferal research. I have been greatly benefited by his stimulating discussion, prudence and scholarly insights which enabled me to complete this thesis.

I express my sincere gratitude to Dr. E. Desa, Director, NIO, Shri L.V. Subbaraju, Head, Geological Oceanography Division and Shri R.R. Nair, Former Head, Geological Oceanography Division for providing all the necessary facilities and permission to carry out the research work.

I am very much obliged to Prof. U.M.X. Sangodkar, Dean, Faculty of Applied Sciences and Head, Department of Marine Sciences and Biotechnology, Goa University for his kind support on various occasions and to Dr. G.N. Nayak for his help to register me as research student.

I owe much to the encouragement and help of Prof. Y. Matoba, Akita University, Japan and Dr. P.K. Kathal, Sagar University, M.P. for confirming identification of some of the difficult species of foraminifera. Dr. N. Rajeshwar Rao, Madras University, Chennai and Dr. A.D. Singh, Cochin University, Kochi are also acknowledged for their help in identification of some of the important foraminiferal species.

I am very much obliged to Prof. K.S. Valdiya, Emeritus Scientist, Jawaharlal Nehru Center for Advancement of Science, Bangalore for his keen interest in the present study and suggesting me to look into the role played by neotectonic in the study area.

I express my sincere thanks to Dr. G. Rajagopalan, Deputy Director, Birbal Sahani Institute of Paleobotany (BSIP), Lucknow for his kind help in obtaining Radio Carbon Dating.
I am indebted to Dr. N.H. Hashimi, Scientist & Head, Human Resource Development Group, NIO, for critically reviewing the manuscript, which led to an overall improvement of the thesis. This work would not have been completed without his support and inputs. I owe much to him.

I profusely thank to the teaching faculty of Department of Geology, Dhempe College of Arts and Science; Department of Marine Sciences and Department of Geology of Goa University who taught me geology. I am especially thankful to Dr. P.S. Raikar, Dr. K. Mahender, Dr. A.G. Chachadi and Prof. F.V. Antao for their support and encouragement.

I express my sincere thanks to Shri M.C. Pathak and Shri K.L. Kotnala, Senior Technical Officers, NIO under whom I worked as a project trainee for some time and collected valuable sediment samples for the present study. They helped me in acquisition of various geological and geophysical data, and supported throughout the course of this study. I express my gratitude to Dr. A.C. Anil for providing me environmental data of the Kharo creek. Shri T. Suresh and Dr. V. Subrahmanyam are thanked for providing necessary data for figures 2.5(b) and 3.2.

I take this opportunity to thank Dr. S.A.H. Abidi, Member, Agricultural Scientists Recruitment Board, PUSA, New Delhi, for the encouragement and sanctioning (as Director, Department of Ocean Development) the project in which I have worked as research scholar.

I express my sincere thanks to my colleague Shri Ranjay Sinha for generously devoting his valuable time at the need of hour. I owe much to him for his advice, constructive criticism and help during various stages of this work.

My thanks are also due to Dr. N. Khare, Dr. Pravin J. Henriques, Ms. Sheeba John, Ms Rani Gilbert, Ms. Ramila, Mrs. Michell Henriques and Shri Abhijit Majumadar for their help at various stages of the work.

I am also thankful to the Senior Scientists of NIO, Drs. D. Gopala Rao, Z.A. Ansari, M.V.S Guptha, V. Ramaswamy, D.V. Borole, O.S. Chauhan, V.K. Banakar, A.R.

Shri V. Khedakar and Shri Areef Sardar are acknowledged for helping me in obtaining Scanning Electron Microscope photographs and Shri Umesh Sirsat for preparing the plates.

I am also thankful to Shri S. R. Bhat, Scientist-in-Charge and his staff of Publication and Reprographic Division, particularly S/Shri V.M. Date, M. Wahidulla, A.Y. Mahale, S.G. Akerkar, H.D. Punj, U. Javali, R. Uchil and P.W. Pavaskar.

I owe much to the help rendered by Dr. M.P. Tapaswi, Documentation Officer, NIO and his staff for providing library facilities.

I take this opportunity to thank my friends Drs. V.V.S.S. Sarma, Thamban Meloth and Balakrishnan Nair, and S/Shri P.V. Bhaskar, Harish Chand, Basant Kumar Pradhan, Vishwakiran and Damodar Shenoy for their help.

I am thankful to Department of Ocean Development (DOD) for providing me research fellowship under Grant No. DOD/12-MMDP/2/95.

Last but not the least, I am indebted to my parents and family members whose love, affection and support encouraged me to pursue this research and complete my thesis. I will remain indebted to my elder brother Dr. A.K. Chaubey, who not only supported my education throughout but spent number of sleepless night to bring this thesis in its present form. I shall be failing in my duty if I forget to acknowledge my bhabhiji Mrs. Gyanti Chaubey and dearest nephews Anup and Manish, whose love and affection motivated me to pursue such an important assignment.
