

CONTENTS

1.	INTRODUCTION01
1.1	Green chemistry approach of nanoparticle Biosynthesis04
1.2	Biofunctionalized noble nanoparticles as drug delivery systems05
1.3	Nanotoxicology06
1.4	References08
2.	LITERATURE SURVEY11
2.1	Methods for synthesis of nanoparticles11
2.2	Properties of nanomaterials12
2.3	Application of nanomaterials12
2.4	Synthesis of nanoparticles using bio-based protocol13
2.5	Biofunctionalization of noble metal Nanoparticles15
2.6	Characterization of silver and gold Nanoparticles16
2.7	Scope and objective of the thesis19
2.8	Outline of the Thesis21
2.9	References22
3.	THEORETICAL AND EXPERIMENTAL ANALYSIS27
3.1	Biosynthesis of metal nanoparticles27
3.2	Biosynthesis of silver nanoparticles28
3.3	Biosynthesis of gold nanoparticles31
3.4	Experimental analysis34
3.5	Biosynthesis36
3.5.1	Biosynthesis of gold nanoparticles using guava leaf extract36
3.5.2	Biosynthesis of silver nanoparticles using clove buds extract44
3.5.3	Biosynthesis of metal nanoparticles using cow milk preparations53

3.5.4	Biosynthesis of polyshaped gold nanoparticles from guava leaf extracts59
3.5.5	Biosynthesis of Irregular gold nanoparticles from dried clove buds72
3.5.6	Biosynthesis of gold nanoparticles using Fermented cow urine83
3.6	Thermogravimetric analysis (TGA) to understand the probable mechanism of biosynthesis90
3.7	References94
4.	PHARMACOLOGICAL SCREENING101
4.1	Antibacterial activity of functionalized silver nanoparticles101
4.2	Antimicrobial mechanism110
4.3	Anti-oxidant activity of functionalized silver nanoparticles112
4.4	Wound healing activity of functionalized silver nanoparticles115
4.4.1	Resutured incision wound119
4.4.2	Estimation of collagen content in granulation tissue120
4.4.3	Wound healing studies121
4.5	Anti-cancer studies133
4.6	References147
5.	NANOTOXICOLOGY OF SILVER AND GOLD NANOPARTICLES151
5.1	Materials and methods153
5.1.1	Animals and housing153
5.1.2	Vehicle and dose selection154
5.1.3	Treatment and observations154
5.1.4	Food intake and body weights155
5.2	Clinical Pathology investigations for toxicity groups155
5.2.1	Haematology156

5.2.2	Clinical chemistry156
5.2.3	Urinalysis156
5.3	Pathology studies157
5.3.1	Necropsy and Tissue collection157
5.3.2	Histopathology158
5.4	Statistical Analysis158
5.5	Physical and clinical examinations, clinical signs and mortality159
5.5.1	Ophthalmological examination160
5.5.2	Body weights and cumulative net weight gains160
5.5.3	Clinical pathology investigations160
5.5.4	Pathology161
5.6	References181
6.	SUMMARY AND CONCLUSIONS182
6.1	Biosynthesis of functionalized silver anoparticles using different microorganisms, plant extracts and bio-excretories and their pharmacological screening183
6.2	Biosynthesis of functionalized gold nanoparticles using different microorganisms, plant extracts and bio-excretories and their pharmacological screening185
6.3	Nanotoxicology studies187
