1. Pathogenicity test  29
2. Inoculation experiments  29
3. Effect of temperature on the radial growth of pathogens  32
4. Effect of temperature on the diseases development. 35
5. Effect of relative humidity on disease development. 35
6. Effect of age of the culture on the disease development. 39
7. Effect of age of the fruit on the disease development. 39

Chapter V Discussion and conclusions 43

PART II PATHOGENESIS 49

Section A Pectolytic enzymes.

Chapter I Introduction 52
II Review of literature 57

Sub-section (a) The production and activity of pectic enzymes by Alternaria solani and Alternaria tenuis in culture and in infected tomato fruits.

Chapter I Introduction 65
II Materials and methods 67
III Results 74

1. Pectic enzymes in healthy tomato fruit. 74
2. Pectic enzymes in the diseased tomato fruits inoculated with A.solani. 74
3. Pectic enzymes in the diseased tomato fruits inoculated with A.tenuis. 83
4. Production of pectic enzymes by A.solani in culture. 83
5. Production of pectic enzymes by A.tenuis in culture. 92
Chapter IV Discussion and conclusions 97

Sub-section (b) Effect of cultural conditions on the production of pectic enzymes by \textit{A. solani} and \textit{A. tenuis}.

Chapter I Introduction 102

II Materials and methods 104

III Results 109

1. Effect of different culture media on the production of various pectic enzymes of \textit{A. solani} and \textit{A. tenuis}. 109

2. Effect of native carbon sources on the production of pectic enzymes of \textit{A. solani} and \textit{A. tenuis}. 119

3. Effect of pH on the production of pectic enzymes of \textit{A. solani} and \textit{A. tenuis}. 129

Chapter IV Discussion and conclusions 139

Sub-section (c) Effect of various substances on the production of pectic enzymes of \textit{A. solani} and \textit{A. tenuis} in culture.

Chapter I Introduction 146

II Materials and methods 153

III Results 156

1. Effect of carbohydrates 156
2. Effect of amino-acids 166
3. Effect of plant-growth regulators 176
4. Effect of phenolic substances 187
5. Effect of fungicides 193
Chapter IV  Discussion and conclusions 208

Sub-section (d) Effect of various substances on the activity of polygalacturonase produced by A. solani and A. tenuis in culture.

Chapter I  Introduction 222
II  Materials and methods 224
III  Results 225

1. Effect of carbohydrates 225
2. Effect of amino-acids 225
3. Effect of plant-growth regulators 228
4. Effect of phenolic substances 233
5. Effect of fungicides 236

Chapter IV  Discussion and conclusion 237

Section B  Cellulolytic enzymes

Chapter I  Introduction 245
II  Review of literature 248

Sub-section (a) The production and activity of cellulolytic enzymes by A. solani and A. tenuis in culture and in infected tomato fruits.

Chapter I  Introduction 250
II  Materials and methods 252
III  Results 254
1. Cellulolytic enzymes in healthy tomato fruit
2. Cellulolytic enzymes in diseased tomato fruit, inoculated with A. solani.
3. Cellulolytic enzymes in diseased tomato fruit inoculated with A. tenuis.
4. Production of cellulolytic enzymes by A. solani in culture.
5. Production of cellulolytic enzymes by A. tenuis in culture.

Chapter IV Discussion and conclusions

Sub-section (b) Effect of cultural condition on the production of cellulolytic enzymes by A. solani and A. tenuis.

Chapter I Introduction
II Materials and methods
III Results

1. Effect of different culture media on the production of cellulolytic enzymes of A. solani and A. tenuis. 264

2. Effect of native carbon sources on the production of cellulolytic enzymes of A. solani and A. tenuis. 267

3. Effect of pH on the production of cellulolytic enzymes of A. solani and A. tenuis. 270

Chapter IV Discussion and conclusions 274
Sub-section (c)  Effect of various substances on the production of cellulolytic enzymes of *A. solani* and *A. tanalia* in culture.

Chapter I  Introduction  279

II  Materials and methods  282

III  Results  283

1. Effect of carbohydrates  283

2. Effect of amino acids  286

3. Effect of plant-growth regulators  289

4. Effect of phenolic substances  291

5. Effect of fungicides  294

Chapter IV  Discussion and conclusion  298

Sub-section (d)  Effect of various substances on the activity of cellulase system of *A. solani* and *A. tanalia* in culture.

Chapter I  Introduction  305

II  Materials and methods  307

III  Results  308

1. Effect of carbohydrates  308

2. Effect of amino-acids  311

3. Effect of plant-growth regulators  311

4. Effect of phenolic substances  316

5. Effect of fungicides  316

Chapter IV  Discussion and conclusions  321
Section C  Studies on metabolites

Chapter I  Introduction  326
II  Review of literature  328
III  Materials and methods  332
IV  Results  343
V  Discussion and conclusion  350

PART III  CONTROL MEASURES

Chapter I  Introduction  356
II  Materials and methods  357
III  Results  358
1. Effect of fungicides on the rotting of tomato fruits by *A. solani* and *A. tenuis*.  359
2. Effect of phenolic substances on the rotting of tomato fruits by *A. solani* and *A. tenuis*.  361

Chapter IV  Discussion and conclusions  362

PART IV  MISCELLANEOUS

General summary and conclusion  364
Bibliography  376
