ACKNOWLEDGEMENT

This thesis has been kept on track and seen through to completion with the support and encouragement of numerous people including my well wishers, my friends, colleagues and various institutions. At the end of my thesis I would like to thank all those people who made this thesis possible and an unforgettable experience for me.

First and foremost, praises and thanks to the God, the Almighty, for His showers of blessings throughout my research work to complete the research successfully.

I would like to thank my guide professor G. K. Solanki sir for his continuous guidance, patience and motivation. His guidance helped me in all the time of research and writing of the thesis. I could not have imagined having a better advisor and mentor for my Ph.D study.

I am extremely grateful to Prof. A. R. Jani (Head of the Department) & Prof. K. N. Joshipura, (Former Head), Department of Physics, Sardar Patel University, Vallabhbh Vidyanagar, for their kind support and encouragement during this work. Thanks are also to the authority of Sardar Patel University for providing me all necessary facilities.

I wish to record my whole hearted thanks to Prof. V. M. Pathak, Dr. K. D. Patel for his positive inspiring efforts and kind co-operation throughout the duration of the present investigations.

Additionally, I am very much pleased to acknowledge, the professors of department of Physics, for giving a valuable direction to complete the course work which is a part of my research. Further, I express my deep gratitude and concern for the non-teaching staff members of the department of Physics, and all supporting staff for their kind cooperation during my research work.

I would like to thank Prof. V. S. Patel - Director of Sophisticated Instrumentation Centre for Applied Research and Testing (SICART) – Vallabhbh Vidyanagar (Gujarat), for providing me analysis facilities in his institution. I am very much thankful to University Scientific Instrumentation Centre (USIC) for helping me to solve many technical problems occurred during research time. I also thankful to Prof. Vandana Rao of metallurgical department of MSU – Vadodara (Gujarat) for her kind technical support.

One of the joys of completion is to look over the odyssey and remember all the friends and family who have helped and supported me gracefully along it.

This thesis would also not be possible without the love and support of my Vidyanagar based family Rucha, Ruhi, Bindiya and Sandipbhai who gave me a home away from home. You have been like surrogate families, bearing the brunt of the frustrations, and sharing in the joy of then successes.

In my daily work I have been blessed with a friendly and cheerful group of fellow students, Dipika didi, Sandipbhai, Nitin, Rahul, Vimal, Keyur, Jignesh, Ishita, Jiten, Devangini, Mahesh. Thanks to all for keeping a student astonishingly alive in me.
I am deeply grateful to Keyur Hingarajiya and Sandip Bhatt, who did not hesitate to give hands when needed during my experimental and calculation work.

I also would like to give my gratitude to my lovely roommates, Jigisha didi, Komal, Mona, Pooja, Bhavini, Brijali, and Disha for keeping my desire burning all the time by asking the question that “when will you complete the research work and give us a party?” They all have been great friends over the years, and they will always hold a special place in my heart. This document would be a mess without you.

Amazingly, I managed to meet some people outside of the department, and it turns out that many of them have been among my most critical and constant supporters, true friends and well wishers. I would not be the same person without friendship of Hemali, Jiy, Parthsarthi, Deepak, and Mrugesh. I am so thankful for all the times you’ve scraped me off the ground and reassembled me into a human again.

Finally, I take this opportunity to express the profound gratitude from my deep heart to my beloved parents, late grandparents, and my siblings and cousins for their love and continuous support – both spiritually and materially. I heartily thank to my mota mummy and late mota pappa for their care and love. I also would like to thank my both sister in laws (Alka and Ruchi) and the most loving niece RUTU(nunnu) for the laughter gifted to me with your cute and tender voice on the phone calling me and of course loving me.

In the end, I am thankful to all those who have helped me directly or indirectly.

By....

Ruchita R. Patel
