CONTENTS

Chapter 1  
Introduction  01
1.1 One-dimensional conductors  02
1.2 Models for high-temperature superconductivity  04
1.3 Little’s model  11
1.4 Excitons and electron-hole pairs  13
1.5 Hydrogen bonding  22
1.6 Infrared spectra and hydrogen bonding  29
1.7 Absorption edge spectrum and exciton-phonon coupling  42
1.8 Hydrogen bonding and excitons  54
1.9 Electron-hole liquids in semiconductors  57
1.10 Infrared excitons and infrared luminescence  59

Chapter 2  
Spectroscopic study of hydrogen bonded inclusion compounds of Iodine  80
2.1 Introduction  81
2.2 Experimental Details  81
2.3 Results and Discussion  82
2.4 Conclusions  106

Chapter 3  
Spectroscopic study of hydrogen bonded Cu(N-R-salim)$_2$ where R=H,CH$_3$,C$_2$H$_5$ and C$_6$H$_5$ with emeraldine,nigraniline and pernigraniline  110
3.1 Introduction

3.2 Experimental details

3.3 Results and Discussion

3.4 Conclusions

Chapter-4 FTIR spectroscopy of hydrogen bonded Cu(N-R-salim)$_2$ with six dyes

4.1 Introduction

4.2 Experimental Details

4.3 Results and Discussion

4.4 Conclusions

Chapter-5 FTIR spectra of Ni(N-R-salim)$_2$ hydrogen bonded with emeraldine, nigraniline and pernigraniline

5.1 Introduction

5.2 Experimental Details

5.3 Results and Discussion

5.4 Conclusions

Chapter-6 FTIR spectra of Ni(N-R-salim)$_2$ hydrogen bonded with six dyes

6.1 Introduction

6.2 Experimental Details

6.3 Results and Discussion

6.4 Conclusions
Chapter-7  FTIR spectra of lead phthalocyanine hydrogen bonded with emeraldine,nigraniline and pernigraniline  
7.1 Introduction  
7.2 Experimental Details  
7.3 Results and Discussion  
7.4 Conclusion  

Chapter-8  FTIR spectra of lead phthalocyanine hydrogen bonded with six dyes  
8.1 Introduction  
8.2 Experimental Details  
8.3 Results and Discussion  
8.4 Conclusions  

Chapter-9  FTIR spectra of Ni(Hdmg)₂ hydrogen bonded with emeraldine,nigraniline and pernigraniline  
9.1 Introduction  
9.2 Experimental Details  
9.3 Results and Discussion  
9.4 Conclusions  

Chapter-10  FTIR spectra of Ni(Hdmg)₂ hydrogen bonded with six dyes
10.1 Introduction 287
10.2 Experimental Details 287
10.3 Results and Discussion 288
10.4 Conclusions 302

Concluding Remarks: 304

1 General Conclusions 304
2 Future scope of the work 307
3 Applications aspects 308
