**Acknowledgements**

First and foremost I would like to thank God for giving me the power to believe in myself to pursue my dreams, which could never be possible without the faith I have in the Almighty.

The special thanks are due to my research guide **Prof. N. J. Parmar** for his continue support, along with constructive suggestions, for progress of the study throughout the entire Ph.D. work. Words are inadequate to express my deep sense of gratitude to him for his invaluable guidance.

I sincerely thank **Dr. H. S. Patel**, Professor and Head, Department of Chemistry, Sardar Patel University, for providing adequate research facilities, and also teaching and non—teaching staff for their kind support.

I would like to acknowledge and remember all the teachers whom I learnt so many things at my childhood. Without their blessings, I couldn’t have continued the journey to my academic goal and achievement.

For financial support, I sincerely thank the University Grants Commission (UGC), New Delhi for its “Research Fellowship in Sciences for Meritorious Students” (RFSMS) Scheme, and UGC section, Sardar Patel University for its smooth handling.

I am also grateful to **Dr. Vivek K. Gupta** and his research group, Post-Graduate Department of Physics & Electronics, University of Jammu, Jammu-Tawi, India for the single crystal X-Ray Diffraction analysis.

Thanks are due to SICART, Vallabhbh Vidyanagar; Piramal Discovery Solution, Ahmedabad; Microcare Laboratory, Surat and Nutan Dye Chem., Surat for rendering their time to time help in the course.

I thank DST, New Delhi, in general, and the PURSE central facility (vide sanction letter DO. No. SR/59/Z-23/2010/43 dated 16th march 2011) at the university, in particular, for providing the LCMS facilities.

I also take this opportunity to express my gratitude to the selfless people from the core of my heart, who with their constant support, affection, inspiration and encouragement, made me feel comfortable to successfully complete this venture.
My parents deserve the special mentions for their inseparable support and prayers. My Father, in the first place, is the person who put the fundament my learning character, showing me the joy of intellectual pursuit ever since I was a child. My Mother is the one who sincerely raised me with her caring and gently love. Brother, Uncle, auntie and cousins, thanks for being supportive. Anita (Ani), my wonderful wife... Her intelligence, honesty, and love have many times been the reason why I did not turn around and run away. Words are not sufficient for the love and gratefulness that I feel for her.

My acknowledgement will never complete without the special mentions of my senior lab-mates Dr. Shashikant Teraiya (SBT) and Dr. Riken Patel (Rik’s), who taught me the laboratory discipline and of course made me understand the hard facts of the life. My heartfelt thanks are also due to my fellow lab-mates Bhavesh, Balvant, Tushar and Bhagyashri for their kind support in the wonderful days of my Ph.D. study. I also acknowledge my room-mates Shashi, Chetan, Hitesh and Jitubhai for keeping a healthy atmosphere. Also, I thank my friends; Govind, Pravin, Vivek, Bhuro, Umesh, Devji, Bhautilk, Jaimin, Abhi, Piyush, Shailesh, Tarun, Harshad, Mehul, Mungra, Rohit, kishan, Deepali, Sanjay, Pankaj, Atul, Tada, Kinnar, Jigar, K.K., Paresh, Amit, Pradip, Hardik, I.V., Satish, Ketan, for their co-operation throughout the research work.

Finally, I would like to thank everybody who was important to the successful realization of the thesis, as well as expressing my apology that I could not mention personally one by one.

Vallabh Vidyanagar Hitesh A. Barad
