CONTENTS

1. CHAPTER

General Introduction

1. 1 Historical Perspective and Structural Variations in IL 1
1. 2 Typical Properties and Applications of ILs 6
1. 3 Chemical Applications of ILs 8
1. 4 Microemulsions Containing IL-TX-100-Organic Solvents by Addition of Water 10
1. 5 Surfactant Like Ionic Liquids 11
1. 6 Questions to be Addressed 14
1. 7 References 18

2. CHAPTER

Experimental

2. 1 Materials

2. 1. 1 Chemicals and Reagents 27
2. 1. 2 Synthesis of ILs 28

2. 2 Methods

2. 2. 1 Surface Tension 55
2. 2. 2 Electrical Conductivity 56
2. 2. 3 Nuclear Magnetic Resonance Spectra (NMR) 56
2. 2. 4 Dilute Solution Viscosity 57
2. 2. 5 Density 59

2. 2. 6 Small Angle Neutron Scattering (SANS) 60

2. 2. 7 Differential Scanning Calorimetry (DSC) 61

2. 2. 8 Static Light Scattering (SLS) 61

2. 2. 9 Small Angle X-ray Scattering (SAXS) 61

2. 3 Data Analysis Procedures

2. 3. 1 Surface Active Parameters 62

2. 3. 2 Thermodynamic Parameters of Aggregation 63

2. 3. 3 Aggregation Numbers from $^1$H NMR Spectra 64

2. 3. 4 Viscosity Related Parameters 65

2. 3. 5 Volume Related Properties 65

2. 3. 6 Small Angle Neutron Scattering (SANS) Data Analysis 67

2. 4 References 70

3. CHAPTER

Thermophysical, Surface Active and Aggregation Behaviour of Short Chain Methylimidazolium Based Ionic Liquids of Type $[C_n\text{mim}]\ [X]$, $n = 4, 6, 8$ and $[X] = \text{Cl}^-$, Br$^-$ and I$^-$ in Water

3. 1 Introduction

3. 1. 1 Thermophysical Properties 71

3. 1. 2 Surface Active Short Chain ILs 74

3. 2 Results and Discussion

Thermophysical Behavior of Short Chain Methylimidazolium Based Ionic Liquids of Type $[C_n\text{mim}][X]$, $n = 4, 6, 8$ and $[X] = \text{Cl}^-$, Br$^-$ and I$^-$ in Water

3. 2. 1 Thermophysical Behavior of Ionic Liquid + Water Binary Mixtures 77

3. 2. 2 Partial Excess Molar Volume 81
Surface Active and Aggregation Behavior of Short Chain Methylimidazolium Based Ionic Liquids of Type \([C_n\text{mim}][X]\), \(n = 4, 6, 8\) and \([X] = Cl^-, Br^-\) and \(I^-\) in Water

3. 2. 3 Critical Aggregation Concentrations (CAC) 86

3. 2. 4 Surface Active Parameters 94

3. 2. 5 Thermodynamic Parameters of Aggregation 96

Characterization of Micro - Structural Features of Aggregates

3. 2. 6 \(^1\)H NMR Chemical Shifts 98

3. 2. 7 SANS Distribution Curves – Concentration Effects 100

3. 3 Supplementary Tables 106

3. 4 References 119

4. CHAPTER

Effect of Additives on the Surface Active and Morphological Features of 1-Octyl-3-methylimidazolium Halides Aggregates in Aqueous Media

4. 1 Introduction 121

4. 2 Results and Discussion

4. 2. 1 Critical Aggregation Concentrations (CAC) 123

4. 2. 2 Effect of Salt Additives on Surface Active Parameters 129

4. 2. 3 Thermodynamic Parameters of Aggregation 132

4. 2. 4 Effect of Additives on Morphological Features of Aggregates 135

4. 3 Supplementary Tables 140

4. 4 References 149
5. CHAPTER
Surface Chemical and Aggregation Characteristics of Pyridinium Based Ionic Liquids in Water - Surface Tension, $^1$H NMR Chemical Shifts, SANS and SAXS Measurements

5. 1 Introduction 151

5. 2 Results and Discussion

5. 2. 1. Critical Aggregation Concentrations (CAC) 155
5. 2. 2. Surface Active Parameters 159
5. 2. 3. Thermodynamic Parameters of Aggregation 160

5. 3 Aggregation Behavior

5. 3. 1. Densities and Partial Molar Volumes 162
5. 3. 2. $^1$H NMR Chemical Shifts 165
5. 3. 3. SANS Measurements 166
5. 3. 4. SAXS Measurements 169

5. 4 Discussion 171

5. 5 Supplementary Tables 178

5. 5 References 183

6. CHAPTER
Effect of Alkyl Chain Length and Head Group on Surface Activity and Aggregation Behaviour of Surface Active Ionic Liquids in Water

6. 1. Introduction 185

6. 2 Results and Discussion

6. 2. 1 Critical Aggregation Concentration (CAC) 186
