ACKNOWLEDGEMENT

First of all, I would like to express my deep and sincere gratitude to my Guide and Guru Dr. Ketul N. Patel, Department of Chemical Sciences, Natubhai V. Patel College of Pure and Applied Sciences (N.V.P.A.S.), Sardar Patel University. His wide knowledge and his logical way of thinking have been of great value for me. His understanding, encouragement and personal guidance have provided a good platform for the present thesis.

I wish to express my warm and sincere thanks to Dr. V. D. Bhatt, Head, Department of Chemical Sciences, N.V.P.A.S., for his detailed and constructive comments and his important support throughout the work. I am also thankful to Dr. Smita srivastava, N.V.P.A.S., for her valuable suggestions during my work.

I owe my most sincere gratitude to Dr. Bhavin Patel (Department of Chemical Sciences, N.V.P.A.S., Sardar Patel University) who gave me untiring help during my difficult moments. Their kind support and guidance have been great value in this study.

I sincerely thank Dr. Akshay Gupte (Head, Department of Microbiology, N.V.P.A.S.), Mayur Joshi, Yogesh Patel and Dr. Manisha for biological research work, which was indeed a difficult task for me to perform as many of the aspects were out of my area of study and knowledge but turned easy with their support.

I also thankful to Dr. Basudeb Bakshi, Principal, N.V.P.A.S. for providing the infrastructural facilities to carry out my research work.

My special thanks to Mr. Kuldip, Mr. Ram, Mr. Gautam and Mr. Yogendra for their constant support and share their knowledge. I would rather be selfish if I forget to thank the non teaching staff.

I have no words to express my feelings and authentic obligation towards my parents, my both sisters, my elder brother, my Jiju, my nephews and my wife for their constant encouragement and who waited ever so patiently during the tenure of the work. This work in final form could not have been possible without the obligatory help and encouragement of many individuals. It is impossible to include them all. But I am extremely thankful to one and all who have contributed directly or indirectly in my endeavor.

The work on this thesis has been inspiring, often exciting, some time challenging, but always interesting experience so, I am the only responsible person for the mistakes that might have still managed to escape attention.

Last but not least, I offer my prayer to “God” for his blessings I have successfully completed my mission.

Sandip G. Patel
