Acknowledgements

It gives me a great pleasure in expressing my gratitude to all those who have supported me and had their contributions in making this doctoral study possible.

First and foremost, I offer deepest gratitude to my guide Prof. N. J. Parmar sir. From finding an appropriate subject in the beginning to the process of writing thesis, his unreserved help and guidance has continued step by step up to finishing of the work. Without his kind instruction with inspiration it was impossible to finish my Ph.D. work. Apart from research, I also learnt how to view this field from new perspectives.

I sincerely thank Prof. H. S. Patel, Head of the department and Prof. (Miss) R. G. Patel, Ex-Head, for providing necessary research facilities, infrastructure and encouragement throughout the pursuance of the course.

I am thankful to the University Grants Commission (UGC), New Delhi for finical assistance under the UGC Scheme of RFSMS (Research Fellowship in Sciences for Meritorious Students), and to the UGC section of S. P. University for smoothly handling the fellowships throughout my studies.

Thanks are due to SICART, Vallabh Vidyanagar, Piramal Discovery Solution, Ahmedabad, Microcare Laboratory, Surat, Nutan Dye Chem., Surat also because of rendering their time to time help in the course.

I am grateful to Prof. Vivek K. Gupta, P.G. Deptt. of Physics, University of Jammu, Jammu-Tawi, India for the single crystal X―ray diffraction data and their analysis.

I also thank entire teaching and non-teaching staff–members of the department for their valuable co-operation and support.

I couldn’t imagine my current position without the love and support from my family. I thank my father Mr. Ranchhodbhai and mother Mrs. Diwaliben, very much for striving hard to provide me with good education, and my siblings Ravi, Geeta whose warmth and nice tight hug conveyed me that everything in life is fine. I always fall short of words and felt impossible to describe their support in words. If I have to mention one thing about them, among many, then I would proudly mention that my parents are very simple and they taught me how to
lead a simple life. I would simply say, “Ba, Bapuji you are great and I love you so
so much. I would like to thank my fiancee, Mamta for the never-ending love,
care, support and affection. You are one of the best decisions of my life.

It’s very important to have a nice social environment outside the lab. The
city, Vallabh Vidyanagar, itself has taught me several good lessons, and it has
given me several good friends, which have rarely left me alone. In this regard, I
would like to thank my colleagues; Shashi, Riken (rik’s), Hitesh, Balvant (ballu),
Tushar (jadiyo) and Bhagyashri (b hut) for their kind help, and my friends;
Bhautik, Rohit, Jayesh, Jigar, Chetan, Jasu, Satish, Nilesh, Devji, Kishan, Umesh,
Shailesh, Abhi, Piyush Kalaria, Atul, Hardik tada, Jagatiya, Gaurav, Sharad, Harsh,
Mehul, Vishal, Jayraj, Pankaj, Sanjay, Kinnar and Kaushik for their co-operation
throughout research work. Chaitanya, Dhiraj, Amit, Tarun, Hardik, Hitesh,
Hemal, Bharat, Harshad, Ketan, Jiten and Pandit—thank you so much to all of you
for enjoying life with hot tea, fighting and laughing always on nothing, at BTS.

I would like to thank my roommates Jemin (bavo), Harshad (modi), Tarun
(rabari), Hitesh Dholariya (khunkhar), Piyush (pilo) and Mungra (saib). I value
each and every moment of togetherness spent in your company. I have a lot of
wonderful memories of all the fun we had together. The bond that we shared is
so special that I want to keep it safe and fresh with me always. I will never forget
the lovely moments spent with you. You were with me all the times and I
acknowledge that truly. I wish lots of happiness in life to all of you.

Vallabh Vidyanagar         Bhavesh R. Pansuriya
