ACKNOWLEDGEMENTS

I express my profound sense of reverence to my research guide Dr. (Mrs.) S. Manocha, for her constant guidance, support, motivation and untiring help during my Ph.D. I am too tiny to speak of her academic and research abilities. She squarely fits into frame of an ideal teacher and guide. Whenever I was stuck up with my research work, she was always there to remove the clouds of doubt and thereby to impart clarity and confidence. While working under her, I have been able to cultivate a genuine insight into research. It has been a rich and rewarding experience which has laid firm foundation of my research career.

I express my deepest gratitude to Dr. L. M. Manocha for boosting my morale throughout the course of research. He has always been caring, a source of wisdom and motivation. He is a great leader. Under his guidance I successfully overcame many difficulties and learned a lot. His unflinching courage and conviction will always inspire me, and I hope to continue to work with his noble thoughts. I warmly thank him for his valuable advice, constructive criticism and his extensive discussions around my work.

I must show my gratitude towards my friends and colleagues Dr. Imad Ali Dishar, Dr. Rajesh Pande, Dr. Vishal Makadia, Dr. Hemang Patel, Dr. Kalpesh Patel, Dr. Guddu Parasad, Mr. Milan Vyas, Mr. Valay Solanki, Mr. Karshan Ram, Mr. Ankur Darji, Mrs. Arpana Basak, Mrs. Sumitha Naik and Mr. Hasmukh Gajera, Dr. Chetan Sheth and Mr. Ramjibhai Patel without whom it would have been difficult to face the hard times. They offered their help and support at any stroke of the clock. I am grateful to them for their unconditional support to keep me working. My discussions with them always produced fruitful results and new avenues. I always discussed with them about my thrust areas and their scholarly remarks helped me out.
For the present work I had used testing facility at Sophisticated instrumentation Centre for Advance Research and Testing (SICART), Vallabh Vidyanagar. I am grateful to the Operators and Management of SICART-CVM for providing the facility.

I am grateful to the Head Department of Materials Science, DST, CAS-II (special assistance programme) and University Grant Commission (UGC), Govt. of India for providing me fellowship under its various schemes to the Department of Materials Science.

My family has played an incredible role in making me what I am today. The words are insufficient to express my gratitude to my beloved parents Shri Pravinbhai Joshi and Smt. Maheshwariben Joshi. My parents’ faith in me and their positive expectations cannot be replaced by anything under the sun. They have everything one can expect from ideal parents. Special thanks goes to my elder brother Tarak Joshi and sister-in-law Krishna Joshi for all the support, time and patients they have given me to accomplish my thesis. I would also like to especially thank my family for all the support and time they have endured me throughout my studies. They are the unfailing resources of life sustaining enthusiasm and vitality. I thank my family for such rare and tremendous support. I’m very grateful to my sweet and lovely nieces Kruti and Hetvi whose innocent smile always makes me feel happy.

I am thankful to non-teaching staff Mr. R. M. Rana, Mrs. Parul Sheth, Mr. Pankaj Patel, Ms. Priti Thakker, Mr. Anton Macwan and Mr. Vinay Christian for their constant cooperation.

With deep and heartiest sense of gratitude I thank my mentor Dr. (Mrs.) S. Manocha and Dr. L. M. Manocha for their love, blessings and inspiration.

Parth Joshi
