ACKNOWLEDGEMENT

I would like to thank and express my indebtedness and heartiest gratitude to my supervisor Dr. Bhupendra R. Parekh, Professor and Head, Electrical Engineering Department, Birla Vishvakarma Mahavidyalaya, Vallabh Vidyanagar for his inspiring guidance, constant encouragement, moral support and keen interest in minute details of the work. I humbly acknowledge my thankfulness to him for spending his valuable time in constructive technical discussions, ideas and for providing me positive appreciation as well as skillful guidance on the subject area throughout the period of my research work. I am extremely thankful to him for taking the painstaking and exhaustive involvement in preparation of manuscript of this thesis. Without his assistance, experience, wisdom and problem solving abilities, this work, as it is presented, would not have been possible.

I am also thankful to Mrs. Parekh for her motherly care during the technical discussion at her home.

I am thankful to the management of ADIT. I owe my heartfelt thank to Dr. R.K. Jain, Principal, A.D. Patel Institute of Technology, for providing all the necessary facilities for carrying out this work till its completion.

I am also thankful to the Director, Sophisticated Centre for Applied Research and Testing (SICART) for providing me a platform to pursue my doctoral studies and necessary support at all stages of this work.

It is my pleasure and proud privilege to mention that I have received very useful help and inspiration from the authority, my colleagues, well wishers and friends in completing the arduous research assignments which I took up on hand before about four years.

I should not forget to express my gratitude and thanks to Mrs. Chetna M. Vyas, Mrs. Manisha Patel and Mrs. Chandani Parmar who rendered useful support to me in the need of time.
I express thanks to the authors of the papers and books which were consulted for this work. I express my special indebtedness to all the reviewers who have spent their valuable time in reviewing my research papers and provided valuable inputs.

My deepest gratitude goes to my parents, Vinodchandra and Snehlattaben for their constant encouragement and blessings. I really appreciate all your support, encouragement, love and understanding during my many years of study. It is only because of their support in upbringing my children Kalp and Nitya during my study. Needless to mention that the inspiration and encouragement rendered to me by my Siblings Hemaxi Trivedi, Sachin and Viral. and also Sister-in-law Priyanka and Dr. Jyoti.

Words can hardly explain the co-operation and patience of my sons Kalp and Nitya. I feel to express sincerely that I am highly grateful to my esteemed life partner Umesh Kansara for appropriately availing an opportunity to a female member of the family to be in tune with the spirit of women empowerment: I bow down to him for the same. I have no words to express the support my husband provided me to fulfill my endeavor of doctoral work.

The success of the entire work is attributed to the Grace of the Almighty Lord Shri Krishna and I firmly believe that I am only His instrument as a human being. I have done what He has helped me to do for bringing this wonderful day in my life.

(Bindu U. Kansara)
