## CONTENTS

### CHAPTER 1 INTRODUCTION 1-37

1.1 Introduction .......................... 1
1.2 Towards a workable definition ........... 3
1.3 Catalyst development and commercialization 5
1.4 Catalysis concepts and terminologies ...... 7
1.5 Catalyst characterization .................. 13
1.6 Present trends in catalysis .............. 16
1.7 Solid acid catalysts-An alternate approach to liquid acid catalysts 18
1.8 Pores and porosity ...................... 23
1.9 From micropores to mesopores .......... 25
1.10 Ordered mesoporous materials ......... 26
1.11 Summarising porous materials ......... 28
1.12 Aim and scope of the present work ..... 30

References ................................ 33

### CHAPTER 2 Synthesis and Characterization of MCM-41 Based Catalysts and their Applications as Solid Acid Catalysts in Esterification and Friedel-Crafts Acylation and Alkylation 38-130

2.1 Introduction .......................... 38
2.2 Sol-gel process ...................... 38
2.3 Sol-gel process as applied to silica ...... 44
2.4 Sol-gel synthesis as applied to Zeolites .... 46
2.5 Sol-gel process using templates ......... 49
2.6 The formation of mesoporous structures .53
2.7 Generalized LCT mechanism .......... 56
2.8 Removal of template ................ 58
2.9 Synthesis strategies and characterization methodologies- A literature survey 60
2.10 Experimental ...................... 71
2.11 Materials characterization .......... 75
2.12 Application of Al-MCM-41 and 12TPA-MCM-41 as solid acid catalysts .......... 83
2.13 Esterification ...................... 84
2.14 Literature survey in the current area of study 87
2.15 Experimental ...................... 91
2.16 Results and discussion .......... 93
2.17 Friedel-Crafts acylation and alkylation 101
2.18 Literature survey in the current area of study 106
2.19 Experimental 112
2.20 Results and Discussion 113
2.21 Conclusions 118
References 119

CHAPTER 3 Synthesis and Characterization of Zr-MCM-41 and Ti-MCM-41 and their Application as Oxidation Catalysts 131-160
3.1 Introduction 131
3.2 Literature survey in the current area of study 131
3.3 Synthesis of Zr-MCM-41 and Ti-MCM-41 134
3.4 Material characterization 137
3.5 Application 143
3.6 Experimental 148
3.7 Results and discussion 149
3.8 Conclusions 153
References 155

CHAPTER 4 Synthesis and Characterization of a Palladium Loaded Perovskite MCM-41 material and its Application as an Automotive Catalyst 161-181
4.1 Introduction 161
4.2 Automotive exhaust purification catalysis – Terms and concepts 162
4.3 Materials used as automotive exhaust purification catalysts 168
4.4 Synthesis strategies for automotive catalysts- A literature survey 171
4.5 Aim and scope of the present work 172
4.6 Experimental 173
4.7 Results and discussion 175
4.8 Conclusions 179
References 180
