ACKNOWLEDGEMENT

The thesis report marks the end of a long and eventful journey for which there are many people that I would like to acknowledge for their support along the way. Above all I would like to acknowledge the tremendous sacrifices that my parents made to ensure that I had an excellent education. For this and much more, I am forever in their debt. It is to them that I dedicate this thesis.

I am grateful and indebted to my supervisor, Dr. Kamlesh C. Patel, for excellent guidance during the course of this doctoral study. He has truly been a great source of inspiration, insight, and input. The knowledge he has imparted, and the patience he has displayed was vital to completing this study. I am thankful for the immense encouragement that he graciously provided during this study.

I would like to express my sincere gratitude to Dr. Ujjval Trivedi, Dr. Hareshkumar Keharia for each contributing in special and meaningful ways to my personal development and academic success. I also thank Dr. Nataraj for all their advice and help.

A special word of thanks is due to Prof. Datta Madamwar, former Head and Prof. K.S. Rao, Head, BRD School of Biosciences, for providing necessary laboratory facilities required for the successful completion of this work. At this time, I would like to thank Dr. Hitesh Patel, Mr. Nitin Solanki for all their help with analytical equipment.

I sincerely thank the members of my lab, past and present, Dr. Nehal Thakor, Dr. Kishor Chauhan, Dr. Hema Anto, Dr. Rachana Bhatt, Kiransinh Rajput, Hardik Bhatt, Umang Bharucha, B. Kavita, Khyati Pathak, Shradhha Trivedi and Deval Patel. Without the advice and friendship of these colleagues, surviving the last 4 years would have been impossible. I wish to express my thanks to Dr. Badrish Soni, Dr. Sarayu Mohana, Bhavik Acharya and Hilor Pathak for being very co-operative and helpful.
I acknowledge the support of the faculty, non-technical staff and all the postgraduate students in the BRD School of Biosciences. Special thanks go to my friends, near and far, for their love and support that made my stay at Sardar Patel University so memorable.

I would also like to thank and acknowledge the Fellowship granted by University Grants Commission, New Delhi. I would like to acknowledge the technical support that I received from Department of Chemistry, Sardar Patel University and Sophisticated Instrumentation Centre for Applied Research & Testing (SICART), Charutar Vidyamandal, for my research work.

I owe much of my academic and personal success to my parents Mrs. Gayathri and Mr. Narayana Rao and my little sister Ms. Sirisha Divya who, by example, provided me with the motivation and courage to pursue a Ph. D. degree. I would like to thank my dear husband, Ajay Chandra for his endless love and encouragement throughout this entire journey, without whom I would have struggled to find the inspiration and motivation needed to complete this thesis.

Beyond all this I sincerely thank The Almighty who walked me through the thick and thins to see this day.

- Sushma Deepthi
