Acknowledgement

PhD is the biggest dream of my life and without anyone’s help it’s hard to change this dream in realism. This thesis is the end of my journey to obtaining Ph.D. This acknowledgment gives me an immense pleasure and opportunity to express my sincere gratitude to everyone who tried hard to give a shape of success to this effort and made it an unforgettable experience for me.

First and foremost my heartfelt thanks to almighty “Saibaba” without whose blessing I can’t complete the task successfully.

I express my deepest sense of gratitude to my guide Dr. H. S. Patel (Professor & Head, Department of Chemistry, Sardar Patel University). It is a matter of honor and pride to get an opportunity to carry out research work under his precious and able guidance. I have been fortunate enough to have a guide, who gave me the freedom to explore myself and also helped me out when my steps faltered. His patience and support facilitated me to overcome many crisis situations and to finish my research work. I will never forget his efforts which were made for me.

I would like to thank Dr. Pradip K. Bhowmik and Dr. Haesook Han from University of Nevada, Las Vegas, who gave me the permission to do some research work for six months during my stay in USA so that I completed my Doctorate degree within the time constrain.

This effort would not have been possible without the confidence, endurance and support of my family. My special and grateful thanks goes to my parents Shri Pravinchandra R. Modi and Smt. Sarojben P. Modi for giving me the life as I ever dreamed and for their selfless love- blessings and constant encouragement throughout my whole life.
