ACKNOWLEDGEMENT

It is a euphoric phase of some one life, when after a long tenure of hard work and learning, he would be happy to express his gratitude to those whom he respects and counts as very much valuable, during the time of his struggle and tough task.

Fortunately, I have had Professor DR. MOHANBHAI N. PATEL (Prof. of Chemistry, Department of Chemistry) as my guide. His deep knowledge and enormous grasp of the subject and that of Science education are phenomenal in India and abroad too. I would never have considered myself worth of conducting research and documenting it without his valuable guidance and encouragement.

I wish to express my warm and sincere thanks to Prof. J. S. Parmar Ex-Head of the Department of Chemistry, and Prof. R. G. Patel, Head, Department of Chemistry, Sardar Patel University, for their motivation and valuable support throughout the work.

I am thankful to my colleague Dr. Hiteshbhai, Dr. Pramod, Sanjay, Deepen, Pradhuman, Promise and Bhupesh for sharing joy, sorrow, and all events of happiness and stress during the long working together. Of course their support was enormously helpful to my various projects.

I sincerely thank Dr. Vasudev R. Thakkar (Reader in Biochemistry, BRD School of Biosciences), Mr. Himanshu, Harsul, Pinakin and Amit for biological research work, which was indeed a difficult task for me to perform as many of the aspects were out of my area of study and knowledge but turned easy with their support.

I am lucky to have friends and department partners viz. Jashmin, Jitu, Jay, Anil, Niraj, Spina, Kinnari, Darshan, Divyesh,
Vaibhav, Nirav for being my moral support and causing distress and laugh even during tough moments. I would rather be selfish if I forget to thank the non teaching staff.

My special thanks to Vishal, Dr. Gaurav, Dr. Dhaval, Dhiru, Chintu, Hardik, Jay, Nilesh, and Hetal for their constant support and share their knowledge. I am very much grateful to Dr. Chirayu Desai for helping me during DNA studies.

I am very much thankful to my family friends; Jiten, Lomesh, Reshma, Dhavat, Rutaraj, Mitesh, Kinnari, Kaushal, Purvi, Pinakin and Kanan to give me a lot of encouragement and support.

I am grateful to my dearest and loving friend Jigisha for her directives with constructive suggestions, advices and willingness to share her bright thoughts which were very much fruitful for sharing up my ideas and work ahead.

Towards completion of research of past years, I am taking this opportunity to thank my family to encourage me and step-up in this research work, to provide me unconditional love, support with requisite resources. I feel myself fortunate that they didn’t allow any social, mental or economical pressure during these days.

I can’t forget Alka aunty and Manju aunty for serving me delicious food during my whole master and research period that always reminded me of my mother.

Nehulsinh Chhasatia.
