4.11 Results of analysis of variance on stress and its factors.
4.12 Means and standard deviations on stress and its factors.
4.13 Results of analysis of variance on cognitive difficulties and its factors.
4.14 Means and standard deviations on cognitive difficulties.
4.15 Results of analysis of variance on life satisfaction and its factors.
4.16 Means and SD's on life satisfaction.
4.17 Correlations between factors of personal variables and stress for urban - rural group.
4.18 Correlations between factors of personal variables and stress for male and female groups.
4.19 Correlations between factors of personal variables and stress for arts, science and commerce groups.
4.20 Correlations between factors of personal variables, cognitive difficulties and life satisfaction on urban and rural groups.
4.21 Correlations between factors of personal variables, cognitive difficulties and life satisfaction on male and female groups.
4.22 Correlations between factors of personal variables, cognitive difficulties and life satisfaction on arts, science and commerce groups.
4.23 Correlation between factors of environment and stress on urban - rural groups.
4.24 Correlations between factors of environment and stress on male and female groups.
4.25 Correlations between factors of environment and stress on arts, science and commerce groups.

4.26 Correlations between factors of environment, cognitive difficulties and life satisfaction on urban rural groups.

4.27 Correlations between factors of environment, cognitive difficulties and life satisfaction on male and female groups.

4.28 Correlations between factors of environment, cognitive difficulties and life satisfaction on arts, science and commerce groups.

4.29 Correlations between personal and environmental variables on urban and rural groups.

4.30 Correlations between personal and environmental variables on male and female groups.

4.31 Correlations between personal and environmental variables on arts, science and commerce groups.

4.32 Correlations between demographic characteristics and factors of stress on various categories.

4.33 Correlations between demographic characteristics and factors of cognitive difficulties and life satisfaction for various categories.

4.34 Correlations between demographic characteristics and personal variables on various categories.

4.35 Correlations between demographic characteristics and factors of environment for various categories.

4.36 Stepwise multiple regression analysis using personal factors as predictor of stress.

4.37 Stepwise multiple regression analysis using personal factors as predictor of life satisfaction.
4.38 Stepwise multiple regression analysis using personal factors as predictors of cognitive difficulties. 174

4.39 Stepwise multiple regression analysis using personal and environmental factors as predictors of stress. 175

4.40 Stepwise multiple regression analysis using personal and environmental factors as predictors of life satisfaction. 176

4.41 Stepwise multiple regression analysis using personal and environmental factors as predictors of cognitive difficulties. 176

4.42 Stepwise multiple regression analysis using personal and environmental factors as predictors of stress. 178

4.43 Stepwise multiple regression analysis using personal and environmental factors as predictors of life satisfaction. 179

4.44 Stepwise multiple regression analysis using personal and environmental factors as predictors of cognitive difficulties. 180

1. The Stress Model of unemployment 10
2. The Model proposed for the study 15
3. Representation sample design used in the present study 64
LIST OF GRAPHS

TITLE

1. Interaction effect of residence and discipline on self esteem.  88a
2. Interaction effect of discipline and gender on self esteem.  89a
3. Interaction effect of residence and gender on alienation.  92a
4. Interaction effect of residence and gender on normlessness.  93a
5. Interaction effect of residence, discipline and gender on normlessness.  93b
6. Interaction effect of discipline and gender on physical and social context.  100a
7. Interaction effect of discipline and gender on lack of control.  102b
8. Interaction effect of residence and gender on meaninglessness.  104a
9. Interaction effect of discipline and gender on stress.  106a
10. Interaction effect of discipline and gender on tension.  108a
11. Interaction effect of discipline and gender on joylessness.  108b
12. Interaction effect of discipline and gender on insecurity.  109a
14. Interaction effect of residence, discipline and gender on tension.  110a
15. Interaction effect of residence and discipline on fear of future.  111a
16. Interaction effect of residence and discipline on discomfort. 111b

17. Interaction effect of discipline and gender on fatigue. 112a

18. Interaction effect of residence, discipline and gender on cognitive incompetence. 115a

19. Interaction effect of discipline and gender on psychological satisfaction. 119a
