Acknowledgement

The completion of this thesis would not have been possible without the help of many people. I take this opportunity to acknowledge them for their contribution in my thesis.

At this very moment of accomplishment, I pay earnest homage to my guide, Dr. Pragna Hitesh Parikh, Associate Professor, Department of Zoology, from the very bottom of my heart. Her faith in me and continuous showering of encouragement she offered have been catalyst in every leap I made for my Ph.D. Her enduring enthusiasm for research and distinguished guidance kept me buoyant and stimulating during difficult times in my Ph.D. pursuit. My words and thoughts fall short whenever I try to describe those always astonishing ideas and discussion she offered during tenure of Ph.D. Despite of her ill health, she worked late hours for series of days to review my thesis. I am very thankful to her for helping to secure financial support for my Ph.D. Her unflinching courage and conviction will always inspire me. She has been more than mentor and nothing less than my parents. Beyond this research, I must say that she has been quite well in nurturing emotional bonding with me. Nonetheless, I appreciate those serious co-operation and parental care offered on many occasions by Mr. Hitesh Parikh, sparing his holidays for my thesis work. I am also thankful to Mr. Yashesh Parikh for creating light atmosphere in the stressing times of my thesis compilation.

I appreciate those handy ideas and insightful advice from Dr. B. Suresh for my research work. His pragmatic thinking transformed my approach towards difficulties coming across in my research. I am equally grateful to Dr. Dolly Kumar for her warmth and support.

I am thankful to Head, Department of Zoology for providing me facilities to conduct my research work. I am very thankful to all my teachers in Department of zoology for their valuable help. I am also grateful to Non teaching staff for their timely help in various situations. I am also thankful to my research colleagues for their help during the experimental tenure of my thesis.

I would be doing injustice to myself, if I forget to convey my gratitude to my senior, Dr. Ayaz Rangrez. He always stood by me like my elder brother. He has been highly transparent in sharing knowledge as well equally vocal in discussion throughout the tenure of my work. My friend and a close lab mate Miss Shalaka Sadekarpawar, deserves special thanks for her
immense support since the day she joined. It was her positive attitude and comforting nature
made the work exciting for all of us. There is not a single part of my thesis which does not
involve her help and support. Saying few words of thanks are not enough to describe her
contribution in my work. I am also thankful to Mr. Ankur Upadhayay, for his cool attitude
and patience and helping me in the referencing. They have been like family members since
ever I have known them. I am thankful to God for providing me a research team in the form
of a family, where my guide nourished me like mother, and my fellow mates were like my
brothers and sister, helping me day in and out. I am also thankful to Miss Khushali Pandya
for being the part of the team and helping me during the final compilation of the thesis.

My endeavours without the love and support from my parents & siblings are beyond my
imagination. My parents have always strived for providing us the education best in its class. I
thank them for letting me pursue my interest, even when it seemed incomprehensible. I feel
very proud to mention that my parents are very simple and they taught me how to lead a
simple life. I would simply say, “Mummy, Pappa you are unique in this world!” Words
cannot express how grateful I am to my mother-in law, father-in-law for their love, care and
endless prayer helping me to sustain so far. I would also like to thank to my beloved husband,
who has always been my pillar, my joy and my guiding light.

Last but not the least I would like to acknowledge and thank my loving and caring
grandparents. It is their support that made possible for me to migrate to Vadodara City and
achieve this huge and challenging task of Ph. D. I strongly believe that their prayers played a
very important role in my life. They are the most important people in my world and I dedicate
this thesis to them.

I thank them all and the others who genuinely offered their support. I appreciate those to
whom I might have missed here in spite of their contribution in accomplishment of my Ph.D.

Last but not the least, I am thankful to The Maharaja Sayajirao University of Baroda,
Vadodara, for providing financial support in the form of University Scholarship.
