ACKNOWLEDGMENT

It is my great privilege to dedicate this work to two persons who are highly respected and important and who are friend, philosopher and guide of my life. One is my real father, Late. Kiritbhai Patel, and another is my educational father, my guide, Dr. Kauresh D. Vachhrajani. It is their initial teaching and motivation by which I could put this to work.

The words would be less to thank my institutional Head of the Department, Dr. Deepak Apte (COO, BNHS), who gave me six months leave from the organization so that I can put my best work forward for this study. I also thank him for offering freedom to use my potential and ever friendly, healthy support during the work. I am also thankful to Mr. Anil Agnihotri, GM (ONGC), for allowing this work under ongoing project for Mangrove Restoration and Education Unit.

I am thankful to Dr. (Ms.) Geeta S. Padate and Prof. P.C. Mankodi who remained as Head, Department of Zoology during initial and completion time of the work respectively, and permitted me to work at the department availing the necessary facilities.

I knew that there are anthropogenic pressures on mangrove ecosystem, but I understood why it is there and to what extent it is affecting the mangrove ecosystem. For this guidance and teaching of the above mentioned phenomenon I would like to thank with the deepest sense of gratitude to the following people:

I thank Mr. Jesang Thakor (VIKAS) for his suggestions and help whenever needed. I thank his elderly and experienced guidance during the starting phase of the study. I am also very thankful to Mr.Kalidasbhai Parmar, Mr. Rajubhai Chauhan for their help in arranging community and school awareness programs in the study area. The socioeconomic survey was not possible without their help. I would also like to thank headmen of the villages for allowing me to conduct a survey and community awareness programs. I express my thanks to principals and teachers of schools for allowing me to conduct school education programs. I also express my gratitude towards the local community members who have actively helped me during socioeconomic survey, education programs and collection of associated
benthic fauna. I would like to express my hearty thanks to all the children of the local community and students who actively attended school education programs.

I would also like to express my thanks to Dr. S. K. Dutta (HoD) and Hasmukh Parmar, Amit Kahar (Technical Assistants) of Department of Metallurgical and Materials Engineering, Faculty of Technology, The M. S. University of Baroda, Vadodara for allowing me to use an EDXRF spectrometer to carry out the heavy metal analysis. I would like to thank Prof. Rakesh S. Srivastava (Director) Population Research Center, Department of Statistics, Faculty of Science, The M. S. University of Baroda, Vadodara for allowing me to access the department library for referencing.

I am thankful to my colleague and friend Manan Shukla (Project Officer, BNHS) for helping me in my study. Rajesh Parmar (Field Assistant, BNHS) is a great support system, both on and off the field, so I would like to thank him for his never ending support. I would also like to thank Ms. Khushali Pandya, who helped me in gathering important references for the study. I would also like to thank Dr. Pranav Pandya, Asst. Professor, Lalan College, Bhuj for providing some important inputs in this study. I would also like to thank to Dr. Deepa Gavli, Gujarat Ecological Society, Baroda for providing all information needed for this study. I would like to thank Mr. Palak Thakor for providing some valuable photographs.

I am thankful to Mr. Jignesh Trivedi (JRF) Department of Zoology, Faculty of Science, The M. S. University of Baroda, Vadodara for his help in preparing the final text of the thesis. It is his valuable addition which makes this thesis more effective.

I am thankful to my dear friend Dr. Dishant Parasharya (GEER Foundation, Gandhinagar) and his wife, Ms. Janki Teli (CEE), for being there with me. I would like to thank my friends Hiren, Himani, Nischal and Khushbu for being there as moral support during the study.

I would also like to thank the unknown source of energy who gave me strength when I felt depressed during the course of my work and I would also like to thank known and unknown people who supported me directly or indirectly to shape the present work.
Finally, I would like to thank my mother for supporting me throughout the study period and forever. I can never miss to thank my wife Niyati for all her understanding and patience when I was spending my time in the field and for her constant support and cooperation throughout the study. I would like to thank my in laws, especially Pooja, Brijesh and Priya who helped me and Niyati to take care of our little daughter Tithi, when I was away from her in the field.

At last I would love to thank my lovely daughter Tithi who played a role of an angle by providing strength and energy for me to complete my thesis through her cutest and lovely smile.

(Bhavik Patel)
