Acknowledgement

This effort is made possible by the work, inspiration and contribution of many people.

My guide Dr. Mrs. Shaila Subbaraman provided essential assistance and encouragement in all of the ideas, projects and results presented within this work. My decision to complete this degree and write this thesis was influenced largely by her advice and positive encouragement. I am thankful to her for her guidance and continuous support.

I especially appreciate Prof. Shashank Pujari’s selfless efforts. He has always been instrumental in discussing ideas, reviewing work and giving his critical comments.

I would also like to acknowledge the insight and essential assistance of Prof. Dr. Marco D. Santambrogio. An opportunity to work with him at Reconfigurable Computing Research Group, Politechnico Di Milano, Italy played vital role in the completion of this work. The research group at PoliMi is a very open and friendly group of people eager to share information and assist others. My sincere thanks to all of them. I specially would like to thank Dr. Fabio Cancare for his support and assistance needed to successfully complete some projects contained within this work.
I would like to express my sincere thanks to all the faculty and staff members of the Electronics Department of Shivaji University for their support. I also acknowledge kind support provided by BUTR of Shivaji University in completing all the required formalities.

Gratitude is due to all my friends who encouraged, counseled and advised me along the path and listened to my concerns and struggles. They always made me believe that I can do it !!!

Most importantly, I would like to acknowledge and thank my husband Umeshji and children Viraj and Yash for their patience and support for my academic interests. Umeshji encouraged me throughout my higher education and provided greater help than imaginable to complete this thesis. My appreciation extends to my entire family, who perpetually showed interest and concern in my work and made me feel loved, even though I know they didn’t understand what I was trying to accomplish nor could I explain it to them very well.

Lastly, I humbly bow my head before my Guru Pujya Ashishmuniji. His blessings proved to be source of strength to complete this work.
