Preface
Synopsis

1. Introduction to Fractional Calculus

1.1 Historical foreword
1.2 Fractional derivative
1.3 Heuristics
1.4 Half derivative of a simple function
1.5 The Fractional Integral and Derivatives
   1.5.1 The Fractional Integral
   1.5.2 The Fractional Derivatives

2. Adomain Decomposition Method

3. One dimensional ground water recharge through porous media

3.1 Introduction
3.2 problem1: One dimensional ground water recharge through porous
media with linear permeability

3.3 Mathematical formulation of the problem 1

3.4 Solution of the problem using Adomain Decomposition Method

3.5 Results

3.6 Interpretation

3.7 Problem 2: One dimensional ground water recharge through porous media with parabolic permeability:

   Mathematical formulation of problem 2

3.8 Solution of the problem using Adomain Decomposition Method

3.9 Results

3.10 Interpretation

4. Instabilities in displacement through porous media

4.1 Introduction

4.2 Fingering in a homogeneous medium

4.3 Formulation of the problem 1

4.4 Solution of the problem using Adomain Decomposition Method

4.5 Results

4.6 Interpretation
4.7 Problem2: Fingering in a homogeneous medium involving magnetic fluid: Formulation of the problem 2 45

4.8 Solution of the problem using Adomain Decomposition Method 47

4.9 Results 49

4.10 Interpretation 51

5. Imbibition in double phase flow through porous media

5.1 Introduction 53

5.2 Problem1:
   Imbibition in a homogeneous medium with capillary pressure 53

5.3 Formulation of the problem 1 54

5.4 Solution of the problem using Adomain Decomposition Method 56

5.5 Results 59

5.6 Interpretation 61

5.7 Problem2: Imbibition in a homogeneous medium involving magnetic-fluid: formulation of problem 2 62

5.8 Solution of the problem using Adomain Decomposition Method 64

5.9 Results 66

5.10 Interpretation 68
5.11 Problem 3: Imbibition in a slightly dipping porous media-involving magnetic fluid: Formulation of problem 3 69

5.12 Solution of the problem using Adomain Decomposition Method 71

5.13 Results 74

5.14 Interpretation 75

6. Fingero-imbibition in double phase flow through porous media with magnetic fluid

6.1 Introduction 76

6.2 Problem 1: Fingero imbibition in a homogeneous medium involving magnetic fluid 77

6.3 Formulation of the problem 1 77

6.4 Solution of the problem using Adomain Decomposition Method 80

6.5 Results 82

6.6 Interpretation 84

6.7 Problem 2: Fingero imbibition in a slightly dipping porous medium involving magnetic fluid: Formulation of the problem 2 85

6.8 Solution of the problem using Adomain Decomposition Method 87

6.9 Results 90
7. **Solution of generalized fractional differential equations using ADM**

7.1 Analysis of the Numerical Method

7.2 Examples
   - 7.2.1 Space- and Time-fractional diffusion-wave equation
   - 7.2.2 Space- and Time-fractional differential equation
   - 7.2.3 Non-linear time-fractional advection partial differential-equation
   - 7.2.4 Non-linear time-fractional hyperbolic equation
   - 7.2.5 Non-linear time-fractional Fisher’s equation

Bibliography
