List of Tables

3.1 Days of Incubation at FTP and MTP corresponding to different developmental stages through TSP 44
3.2 Primers used in the study to isolate/characterize the cpWt1 locus and cpWt1 transcribed isoforms 48
3.3 Primers used in the study to isolate/characterize the cpDmrt1 locus and cpDmrt1 transcribed isoforms 50
3.4 Primers used in the study to isolate/characterize the cpAromatase locus and cpAromatase isoforms 52
3.5 Primers used in the study to isolate/characterize the novel SLF35F5 like ncRNA of crocodile 53
3.6 Miscellaneous primers used for: RACE, Genome-walking, and Real-time PCR for few sex determining genes 54

4.1 In-silico predicted coding region coordinates of the eight cpDmrt1 isoforms 91
4.2 Functional classification of the 167 non-redundant ESTs obtained in the subtractive library generated using male GAM as tester and Female GAM RNA as driver 102
