Over my years at the Space Applications Center, many have played vital roles, which had helped me tremendously towards the successful completion of this thesis. First of all I want to express my sincere thanks to my guide Dr V. K. Agarwal for giving me an opportunity to work on this interesting and beautiful topic. Without his valuable guidance and critical comments, it would not have been possible for me to complete this thesis.

I owe my sincere thank to Dr. R. R. Navalgund, Director, Space Applications Center, Ahmedabad for his kind approval to register me in Gujrat University. I am indebted to Dr R. M. Gairola, chief investigator of the project for sharing his enormous knowledge in the field of satellite remote sensing. The guidance, encouragement and motivation provided by Dr. R.M.Gairola is greatly appreciated. His understanding nature and his calm and collective approach towards matters in life helped me to gain the unique attitude to see through difficult times with ease and to put back things within reach. Being away from home, it was a stress releasing moment to visit his family and share some times with them. I sincerely thank to Mrs Gairola, Vivek and Raghav for sharing some light moments with me during the hectic work of the research. I specially thank Dr A.K.Varma for his kind guidance through the course of research work. He helped me in understanding several complicated processes of the remote sensing during the study. The fruitful discussions with him are thankfully acknowledged. The assistance and support received from the MCF, Mr. H. I. Andharia, Mrs. K.Sathyabhama, Mrs. Yagna Mankad, Dhayneshbhai, Mahendrabhai, Dushyantbhai, Trushnaben, Prahlad Bhai, Truptiben, Shiraj Bhai, Mr. I. C. Matieda, Mr. Mahesh Patel and Mr Deepak Maroo is greatly appreciated. I convey my sincere thanks to Mr. M. Damodaram for providing all sorts of administrative helps in hours of need. I am pleased with the friendship of Bijoy, Anil, Abha, Priti, Rakesh, Imran, Nirmala, Vikram, Ishwari, Sahoo, Himavant, Munn Vinayak, Sulagna, Sahedev, Shiva, and Pai with whom I had several memorable moments. The support of my senior colleagues –Mohan, and Rajesh was highly encouraging. My heartfelt thanks to Dr. Abhijit Sarkar, head Oceanic Sciences Division and Dr. P. K. Pal, group head, Meteorology and Oceanography Group for giving me valuable suggestions. Fruitful discussion with Dr. P. K. Thapliyal, Dr. Rashmi Sharma, Dr. Neeraj Agarwal,
Acknowledgements

Dr. Rajkumar, Dr. C. M. Kishtwal, and Dr. Pranav S. Desai is thankfully acknowledged. I would like to acknowledge NASA Goddard Space Flight Center for providing archived data sets. The geophysical parameter of rain from TRMM 3B42 RT downloaded from website http://lake.nascom.nasa.gov/data is thankfully acknowledged.

My deepest sense of gratitude goes to my brothers Mr. Manoj and Mayank Mishra for their goodwill and unconditional love, affection and support. I am indebted to my Bhabhi for providing me moral support in most difficult time of my life. My parents have been always a source of inspiration to me. This work is a result of their blessings, love, affection, encouragement and goodwill. They gave me unconditional love and support throughout my life and have always encouraged me dreaming high. I am indebted to them for raising me in an environment where my education was encouraged, but never forced. I express my sincere thanks to Mahendra Guruji, Shakti Chacha, late Grandma, and Nani for their kind guidance throughout my life. The occasional visits to home were a great and welcome relief from the rigorous of research work. My nephew “buddy” Sarthak and nieces “cutie” Rimjhim and “lovely” Muskan made sure I had an enjoyable and entertaining stay at home. It was a nonstop fun spending the entertaining moments with my school days buddies Alok, Srikant, Monu, Sheley, Doctor, Chandan, Saif, Sonu, Abhisek, Pundit, Rohit, Ankit, Nutan, Ankur, Pappu, Pintoo, Nandu, Shishu, Bholu, and Mohit.

Last but not least, I express gratefulness to Almighty God, because without his unseen support I could not even think to start this work.

Anoop Kumar Mishra
