LIST OF TABLES

2.1: Sensor Specifications of Kalpana satellite 48

2.2: Instrument characteristics for the VIRS, TMI, and PR of TRMM. 54

2.3: TRMM Standard level products 55

2.4: SSM/I Instrument Specifications 57

3.1: Statistics of the comparison between the GPI and TRMM-3B42 75

3.2: Statistics of the comparison between the GPI and AWS rain-gauge 77

3.3: Statistics of the comparison between the MGPI and TRMM-3B42 87

3.4: Statistics of the comparison between the MGPI and AWS rain gauge 88

3.5: Statistics of the comparison between the MGPI and DWR 89

4.1: Statistics of the comparison between the present technique and GPROF algorithm over land 113

4.2: Statistics of the comparison between the present technique and GPROF algorithm over ocean 114

4.3: Comparison of the present technique and Ferraro global scheme with AWS rain gauge 115

4.4: Statistics of the comparison between the rainfall from present technique and DWR 120

5.1: The cloud classification scheme, thresholds, and cloudiness classes definitions 131
5.2: Statistical comparison of 3-hourly rainfall from the present technique and 3-hourly rainfall from TRMM-3B42 for the S-W and N-E monsoon periods for 0.25° resolution

5.3: Statistics of the comparison between the GPCP and present technique

5.4: Statistical comparison of daily rainfall from the present technique, and TRMM-3B42 with the daily rainfall from rain-gauges for the S-W Monsoon period for 0.25° resolution

5.5: Statistical comparison of daily rainfall from the present technique, and TRMM-3B42 with the daily rainfall from rain-gauges for the N-E Monsoon period for 0.25° resolution

5.6: Statistics of the comparison between the DWR and present technique
