ACKNOWLEDGEMENT

Research has always been an ongoing process—a journey and not a destination. So has been mine filled of astonishments and amusements. No research is ever the outcome of single individual’s talent or efforts. This work is no exception. It provides me pleasure to convey my gratitude to all those who have directly or indirectly contributed to make this work a success. As one flower makes no garland, the present work would not have taken shape without wholehearted encouragement, goodwill and cooperation of a number of people and institutions. At this juncture, I seize this opportunity to express my deep gratitude to all of them.

A teacher is a guide, philosopher and friend, whom I could find in my guide Dr. Bhanubhai N. Suhagia, Professor, Department of Pharmaceutical Chemistry, with deep sense of gratitude. My thanks go to him, whose boundless enthusiasm and valuable suggestions made this work possible. It is with affection and reverence that I dedicate often beyond the call of duty. It was a great pleasure working under his guidance. Besides being a guide for my work, Suhagia sir is a father figure and path leader. I am immensely grateful for his wise counsel and support which is incredible. His brilliant creativity and enthusiasm has guided my research work from its conception to completion.

I, at this moment of time, cannot express in words the invaluable guidance and thorough wisdom bestowed by my mentor Dr. Mahesh T Chhabria, Assistant Professor, Department of Pharmaceutical Chemistry, whose deep sharing and synergy have moved me many levels beyond my own thinking. Apart from his technical and scientific guidance, systematic style of working, unbiased nature and perpetual encouragement, has kindled in me the desire to learn the art of synthetic work to the minute detail. He is the one who has ignited my interest in Computational Chemistry and provided me the necessary resources to explore my ideas. I am greatly indebted to him for his moral support and constant creative motivation throughout the course of my work. It is a great pleasure to acknowledge the generosity for the kind venture he had pursued during my study. I am fortunate to share an eternal bond with such a noble soul.

It gives me profound pleasure to express my deep gratitude towards Mr. Ishwarsinh S Rathod, Assistant Professor, Department of Pharmaceutical Chemistry. I would like to thank him for his priceless guidance, overwhelming enthusiasm, uniting cooperativeness, constant encouragement, critical remarks, precise discussions, timely suggestions and the nourishment of knowledge conferred upon me. I would like to thank him for sparing his valuable time for me. He has constantly motivated me to step towards success, without being dissipated by frolics and failures. He trained me to be self-reliant to face the hard realities of life and in traveling any unknown path that I may encounter in
future. The platform which he has given me would be an eternal benchmark for my carrier for which I am extremely indebted to him. I am also thankful to Dr. Shailesh A Shah for his timely moral support that has enabled the successful completion of my work.

With profound gratitude and respect, I give my sincere thanks to Dr. Mukesh C Gohel, Principal, L. M. College of Pharmacy, whose invaluable guidance and fatherly blessings has always been bestowed upon me throughout my educational journey.

I am utmost thankful to Dr. R.V. Bhatt, Professor, Department of Pharmacology, for allowing me to use animal facilities for pharmacological screening. Bhatt sir has always been a beacon of light in all my research endeavors.

My sincere thanks to my esteemed teachers Dr. D.D. Santani, Dr. R.K. Goyal, Mr. D.D. Bhalara, Dr. R.K. Parikh, Mr. H.B. Nanavaty, Mr. S.S. Thakore, Dr. Anita Mehta, Dr. Sunita Jain, Dr. Parloop Bhatt, Dr. Mamta Shah, Dr. Nayana Kapadia and Bakula Madam for extending their wholehearted support throughout my work.

I must thank Dr. M.R. Yadav, Professor, Department of Pharmaceutical Chemistry, The M.S. University of Baroda and Dr. Anil Shinde, Scientist, Suven Life Sciences, Hyderabad who are the real path-setters for my journey towards drug design and discovery. I am proud to begin my journey with such great personalities.

It was due to the generous help from Dr. C Dutt, Director, Torrent Research Centre, Ahmedabad and Dr. Appaji B Mandhare, Assistant Manager, Torrent Research Centre, Ahmedabad, that I could learn the essentials of QSAR and deliver in form of a dissertation work and a few contributions.

I greatly acknowledge financial support from Council of Scientific and Industrial Research (CSIR), New Delhi in form of Senior Research Fellowship.

I am thankful to all the non-teaching staff members of my beloved institute for helping me throughout the course of my study.

I wish to thank all my friends, colleagues, juniors and seniors who helped me directly or indirectly during the course of my study. To mention a few, I am thankful to Shailesh Patel, Bhushan Mahajan, Hareesh Patel and Vijay Parmar with whom I thoroughly enjoyed my stay at the laboratory. It was indeed a pleasure to learn from them many technical and non-technical ground realities.

Last but certainly not the least, I am indebted to God to give me such a caring and loving family whom I can always rely upon. They are the real backbones behind my success story. I greatly
acknowledge the support from my parents, my dear sister and my wife Priyanka, Research Scholar, Department of Pharmacology, L. M. College of Pharmacy. She is the one who is the real witness of all the vicissitudes of my life. She withstood most of my anger and fluctuating behavior when things didn’t go write in or out of my laboratory. Apart from being the closest friend of mine since last 3 years, she would tolerate me for the rest of my life too, and I am extremely thankful to God for that! The work would never have been the same without the generous and affectionate support from my dear friend Priyanka.

Educational institutions have always been the pillar of an individual’s personality, they always bring the real gem out of an individual, and luckily, I am not an exception of this process. Last but not the least, I pay my reverence to this institute, L. M. College of Pharmacy, Ahmedabad. I am undeniably proud to be associated with this college and express my deepest indebted thanks to my esteemed, renowned and prestigious institution for transforming me from nothing to something.

February 2010
