Acknowledgements

This work would not have been possible without the support of several individuals. My research supervisor, Dr. Krishnamurthy Natarajan, whose guidance and expertise were invaluable in all aspects of this project and throughout my development as an individual. I would like to extend my warmest gratitude for always finding solutions, for believing in me and giving me the trust, strength and opportunity to carry on and finishing my studies. I would like to thank him for dedicating his time and interest in me and my studies, for being a warm, caring, patient, and helpful person, and for making me grow as a researcher and as a person, and for making me believe in myself. Thanks for always being willing to answer questions. And for always knowing the answers!

I also wish to acknowledge Dr Rao, Dr. Sharma, Dr. Manivel and Dr. Das for their kind support and cooperation. I am thankful to Dr. Rajiv Saxena for allowing us to work in his lab in JNU and to carry out animal experiment without any interference. I am also thankful to Dr. Pawan Malhotra for allowing me to carry out the experiments in his lab.

I want to thank all my lab mates and group members, present and past, for all their scientific discussions, hard work, and for being so thoughtful and a lot of fun in and outside of the lab. I am thankful to Aprajita and Nasir for sharing their technical skills. Dr. Sachin, Varsha, Deepa, Neha, Shingar, Akash, Jhalak and Cecil for their constant co-operation and a pleasant ambience in the lab. I am thankful to Javed bhai for all his help in the cell culture facility and Naresh Sir for his help in lab. I also wish to thank Meha for sharing her expertise with me.

I would like to thank Dr. Chandramouli, Ashok, Rakesh, Munna and other animal house staff for providing us with an uninterrupted supply of mice without which it was not possible to carry out even a single experiment. I also wish to acknowledge the help of Anish, Imran, Azhar, Santosh and Rafiq in TACF facility and Ashok and Pradeep for help in Immunology lab.

In addition to the support by those at my institution and within my department, I must acknowledge how grateful I am for the unwavering encouragement and assistance provided by my batchmates, friends and family. Thank you all my dear friends, for always listening to me, being there for me, and making my life happy. I would particularly like to thank my parents Dr. S. C. Gupta and Rajni Gupta and my brother Saurabh whose confidence in me served as great motivation throughout the past five years. Varsha, thanks for your warm, caring and generous personality and for joining the family.

Last but not the least, the financial help from CSIR, Govt. of India is duly acknowledged.
