ACKNOWLEDGMENT

This study has been completed under the supervision of Professor R.G. Nambiar of SARDAR PATEL INSTITUTE OF ECONOMIC RESEARCH, AHMEDABAD. It is my privilege to express my deep sense of reverence, gratitude and indebtedness to my research supervisor for his expert advice, erudite guidance and enlightenment throughout duration of the study. I owe greater intellectual debt to him than what I could express in words.

I must acknowledge my great debt of gratitude to Professor V.P. Bharadwaj Director, School of Social Science Gujarat University, Ahmedabad for his keen interest, useful and exciting discussions we have had.

My sincere thanks are due to my teachers and well-wishers, Dr. K. L. Chawla, Dr. N.C. Paharya, Dr. Sarojini Gupta of Economic Department, Rajasthan University, Jaipur, who have been a source of inspiration and encouragement to me at all times. I am greatly beholden to them.

Thanks are also due to all the academic and non-academic staff members of SARDAR PATEL INSTITUTE OF ECONOMIC RESEARCH for their support during my research. I am very grateful to Professor R.J. Mody, Director of the Institute, for enabling me to conduct this research work at the Institute and for his support and advice. Special mention must be made of Dr. Rohit Desai and Shri Thomas Mathew for their helpful comments and discussions at the final
stage of the study. Shri Thomas Mathew had been kind enough not only to give necessary and timely encouragement, but also maintained brotherly relation during my stay in India. Special thanks are also due to Smt. Sukumari Murty for her help at the stage of data processing and analysis. The library staff of Indian Institute of Management, Ahmedabad who made all the required literature and research papers available to me in time, deserve a moral of thanks.

Mention must also be made of the many officials in the Ministry of Finance and Economic Planning, Sudan and Bank of Sudan for facilitating the difficult job of data collection and making available the required research materials.

I am extremely indebted to my family members, my parents, brothers and sisters without whose blessings and best wishes this study would not have seen the light of the day. It is much due to their cooperation and patience that this work has been completed. The debt I owe to them has no measure. My advancement in my academic sphere have been magnified by my respected father, his constant attention to my academic life has always carried a personal touch, and for this, I express my deep hearted gratitude to him.

I was fortunate in having a number of friends and well-wishers who have unstintingly helped in countless ways to complete this study. To acknowledge them each by name is formerly would however go against the spirit of my friendship. From the core of my heart, I express my thankful to all of them.
